

MOON CHART 2007

In all meditation it is of value for the student to remember that, from the standpoint of permanent benefit, it is easier to meditate effectively during the period from the new moon to the full moon, than from the full moon to the new moon. The first half of the lunar cycle is one of intensification, absorption and accretion; the second half is one of assimilation and distribution. More real progress over a long period can be made by observing this cyclic law.

Wisely utilizing newly acquired energies keeps inflowing and outflowing channels open and prevents emotional, mental and psychical congestions which may otherwise be experienced, with their accompanying physical consequences.

The full moons of the three spiritual Festivals will be observed worldwide on the following days: *EASTER* on April 2nd; *WESAK* on May 2nd; and *CHRIST'S FESTIVAL* and *WORLD INVOCATION DAY* on May 31st. **Check locally for the actual day of the festival meetings**, which may vary from the date of the full moon.
