## THE DISPENSER OF THE WATER OF LIFE

It is said that one of the primary functions of the coming World Teacher will be to stand as “The Dispenser of the Water of Life”. This relates directly to his work as inaugurator of the Aquarian age which has for its keynote: “Water of life am I, poured forth for thirsty men.” The well-known symbol for the sign of Aquarius is that of the “water-carrier”, the man carrying the pot of life-giving water that nourishes and sustains all who draw from it. The significance of this water and of the coming Aquarian dispensation was relayed to us in the story of the Last Supper. It is said that a man carrying a pot of water led the disciples to the upper chamber of a room in which a solemn ceremony, a communion feast, was held by the Christ. This ceremony included the sharing of bread and wine – symbolic of the physical and spiritual sharing which will be the keynote of the coming Age. This foretells a time when all of humanity will come together in a spirit of true brotherhood. Right human relations will then work out practically through the sharing of resources and the meeting of the many physical plane needs of all within the human kingdom. This may seem a utopian dream, but we now have available to us the requisite resources with which to implement such changes; all that we lack is the commensurate will. But the Christ’s coming work extends beyond the physical plane and as *the Dispenser of the Water of Life* he will work to meet the spiritual needs of the nations and of all people everywhere who are thirsty for truth, for right human relations and for loving understanding. It is upon this essential livingness, this spiritual vitality, that the new civilisation will be founded. The reactionary forces in every land and in every department of life are seeing their influence lessened, with each passing decade, as humanity takes responsibility for its own destiny, restoring the divine circulatory flow and letting the Plan work out.

The life aspect is universal – underlying and interpenetrating all forms and free from limitations of race, sex, age, religious orientation or economic status – and is available to all who establish the necessary conditions within consciousness. The future will see the coming together of humanity, at all levels of society, demonstrating our essential oneness and working towards the upliftment of the whole. When the Christ last worked openly among the people, his life and his physical presence broke down many barriers within the established order. He related to people in all walks of life and was not held back by the established doctrines of his time and faith. Today the path is being cleared for his return, so that the life-giving waters of which he is the custodian can again do their transformative work.

## GROUP CONSCIOUSNESS

---

Evolution is the story of the unfoldment of consciousness. It is the story of the process by which all expressions of life come to reflect and conform to the underlying pattern created by the Will of God. This divine drama is revealed through an understanding of the three stages that govern human unfoldment: *instinct, intellect and intuition*.

Humanity, today, is rapidly moving away from a state of purely instinctual reactions to circumstances and events to a more considered, thoughtful awareness of not only the outer, phenomenal world, but also of the inner, causal levels. The outer Garment of God, the world of the form, has been exhaustively analysed for many centuries. And through the use of the microscope and telescope, and through the cutting edge technologies found in the laboratories of the world, humanity has gathered a remarkable knowledge base of information about the physical plane. Yet, the 'instrument' that has played and continues to play such a formidable role in all this work is the human mind, using the faculties of both the intellect and the intuition. The development of our mental awareness has also brought about creative breakthroughs in our understanding of the subtler planes of consciousness, of the world of the human psyche. Other frontiers, new horizons in consciousness are gradually being sensed by leading thinkers today, formless worlds that reveal the nature of divinity. It is only the intuition, the higher abstract mind that is able to penetrate beyond the boundaries of our purely human existence into the Mind of God. This development marks a significant shift in human attitudes, in the way we interact with one another, and with the higher and the lower kingdoms of our planetary home.

These progressive developments are stimulating the urge to self and group consciousness within the human race. Self-consciousness or self-realisation is the natural expression of many today. This is leading to the blossoming of the human personality though, for a growing number of the human family, self-consciousness is being transcended by group consciousness and polarisation is shifting from the limited life of the personality to that of the inclusive

awareness of the soul.

A great experiment is going on in the world at this time. Quietly, spiritually focused individuals are coming together, inspired by a common holistic vision of human and planetary renewal. From all walks of life – races, religions and social backgrounds – men and women of goodwill the world over are responding to an inner calling that sounds from the very Heart of God. Their minds are opening to a spiritual vision of an unfolding divine Purpose that has been held inviolate throughout the passage of time. A new renaissance beckons, heralding the dawn of an era, an age of enlightenment, which has inspired poets, philosophers and visionaries throughout the millennia.

We are today poised at an epochal crossroads. Behind lies a history of seeming failures and noble achievements, of the slow progress of the human psyche to awaken to the spiritual impulses emanating from the heart of our planetary life. Ahead lies the sweetest fruit of all human endeavour, a true union with the Kingdom of God. And standing at the forefront of this momentous impetus are the members of the new group of world servers. Their outer work is seemingly diverse, yet on subjective levels they share a unity of purpose, inspired by an emerging spiritual pattern that is slowly being woven into the fabric of human life. A rich tapestry of interconnected spiritual ideas, emanating from the Mind of God, is taking shape in the mind of humanity. The unfoldment of group consciousness is the key to the precipitation and right understanding of these ideas, and to lead humanity into an unprecedented period of true peace, unity and understanding.

Triangles is an example of group service work. Collectively, thousands of co-workers around the world link in consciousness each day to serve a common purpose: to magnetise the Triangles network, so that love and light can radiate into the hearts and minds of the human family. In the light of these spiritual qualities humanity is becoming aware of new patterns that reflect the divine will for the coming era: patterns of group consciousness, interdependence, and right relationships.

## INTUITIONAL ASTROLOGY

---

When we contemplate the vast starry heavens, it can sometimes be difficult to see how human activity can in any way influence the workings of the great whorls of fiery light we see before us. What has our human thinking and action to do with great Lives Whose divine purposes cannot even be guessed at? And yet in the apparently simple activity of Triangles, we are forging a link of unbroken wholeness with the One Life which pervades every being, no matter how great or small. Our daily concentration upon light and love weaves human consciousness seamlessly into the etheric net of the universe. Impelled by the sounding of the Great Invocation, the light we sense as the underlying substance of creation, and the love which fuses all beings into complete and perfect relationship, are sent forth into the body of the planet, and from there add their quota of radiance to the wider system.

This wider significance of the Triangles work is touched upon in *Esoteric Astrology*, where Alice Bailey introduces the Science of Triangles as part of the astrology of the future. She indicates that: "...the entire cosmic web and solar system is an intricate, constantly moving, inter-woven series of triangles". The triangle emerges as a simple unit of pattern within the cosmos, which can serve to interpret the complexity of the whole. The challenge for astrologers who seek to understand the deeper aspects of astrology, beyond the purely personal, will be to intuit the patterns of triangular relationship which exist between the many different points of light within the universe. In this way, they can begin to understand how these wider patterns impact upon individuals, groups and nations.

We can assist in this process through our visualisation of the Triangles network, recognising in its pulsating lines of light a mirror of the vault of the heavens. We thereby help to touch the intuitional plane, the plane where there is the first contact with pure truth. Thus, the Triangles network can serve as

a sensitive antenna for those who are seeking to bring in new astrological intuitions because, patterned as it is upon the fundamental building-block of relationship within the cosmos, it naturally resonates with the wider patterns which exist both within and beyond the solar system. The Triangles work emerges not only as a renovation of the three worlds of human endeavour in which we can consciously participate, but also as a precipitation of the pattern of things as they are in the heavens.

As the astrologers of the future seek to bring in new ideas from the intuition about planetary and zodiacal energies, we may expect that there will be an increasing emphasis given to the impact of these energies on groups and on the planet as a whole. This is for a number of reasons. A major factor is that, both astronomically and astrologically, we are now moving into the Age of Aquarius, which is particularly associated with group consciousness. The intuition is spoken of by Alice Bailey as being concerned with group good. Also, humanity is increasingly conscious of itself not just in national, but also in global terms. And the Triangles work, which helps create the atmosphere in which ideas can descend from intuitive levels, is a group activity and a global network.

Astrology has been described as "the science of relationships" – the relationships existing between all living organisms within the universe. The astrology of the future will be concerned with discovering those right relationships which exist within the macrocosm, so that those same relationships may find their microcosmic correspondence within humanity. By creating a network of lighted goodwill, Triangles too is concerned with the establishing of right relations – both within humanity, and between humanity and the planet. Triangles can be seen as a conscious effort on the part of humanity to fit the Earth to be a lighted beacon within the heavens, in right relation with all other points of light.

**The Law of the Universe is to all  
eternity the good of the whole.**

Adapted, Alice Bailey

## ENERGISING THE NETWORK

In the last few years many of us may have seen the wonderful images, which the Hubble telescope has beamed back from space. Such incandescent pictures reveal the wondrous outer beauty of the universe. Yet, what state-of-the-art technology has not been able to record is the intricate inner interrelatedness of all life, linking all forms of expression, whether human, planetary, solar or cosmic into a coherent, majestic Whole.

Underlying the entire physical structure of the universe is the ether of space, the etheric framework, forming "one unbroken field of activity in constant ceaseless motion – an eternal medium for the exchange and transmission of energies." Throughout the cosmos flow different types of energy galvanising, energising and expanding the awareness of all the informing spiritual Lives Who form a part of the Whole.

Understanding the idea of a divine circulatory energy flow is pivotal to the Triangles work. As we visualise our triangles each day and sound the Great Invocation, we invoke the abundant universal energies of light and goodwill, drawing them into the network's magnetic field, where they circulate freely through a triangular matrix. Upon their descent into the world of form, these energies are expressed as right human relationships. This energy flow, precipitated from the highest levels of our planetary Life, is assimilated by the consciousness of humanity, metamorphosing human thought to search for new, innovative, inclusive and, above all, spiritual solutions to the challenges of our world today.

As these progressive ideas unfold, they effect fundamental changes in human attitudes, stimulating the innate divinity of humanity to work for the common

good. At the heart of all these developments is the goal of nurturing the culture of the soul in human living, building a Path of Return, a bridge in consciousness, upon which humanity can collectively approach God and God can approach humanity.

In a universal sense the three points of each triangle symbolically represent the three major planetary centres: Shamballa, Hierarchy and Humanity, and from a human perspective: spirit, soul and body. The triangle portrays the contact or the right relationship between each point and this concept, quite simply, underlies our work, on a human and planetary scale. Each new triangle formed further accelerates the flow of energy, propelling it from the centre of our planetary Life into the consciousness of humanity, stimulating spiritual planning for the welfare of the whole human family.

The Triangles network in etheric substance acts as an interface, strengthening the strands of consciousness that connect the inner and the outer worlds. As the quality of our inner work deepens, we sense the need to form new triangles and so contribute to the spiritual enrichment of human life. We are slowly awakening to our destiny to become a relaying channel of divine expression and not "delaying points of selfish interest" in the life of "the One in Whom we live and move and have our being". Whether we realise it or not, we are contributing to the work of this great cosmic Consciousness, Sanat Kumara, the Lord of the World, as we re-shape the geometric pattern of the planetary etheric vehicle to circulate the will-to-good throughout all forms of divine life upon our planet. It is sacred work that we are called to each day in the quietness of the inner levels.

Triangles is a world service activity in which people link in thought in groups of three to create a planetary network of triangles of light and goodwill. Using a world prayer, the Great Invocation, they invoke light and love as a service to humanity. Further information is available on request from Triangles.

The Triangles Bulletin is for men and women of goodwill and is published four times a year in Danish, Dutch, English, French, German, Greek, Italian, Polish, Portuguese, Russian, Spanish and Swedish. Triangles is an activity of the Lucis Trust, a non-profit educational charity which exists to promote right human relations.
