### ONE HUMANITY, ONE SOUL

Against the backdrop of today's often divisive and turbulent environment, the phrase "One Humanity, One Soul" makes a striking contrast. It sounds a chord and elicits an image of unity and peace that some might initially associate with a utopian dream rather than the underlying reality of the One Humanity which is often less apparent and does not impose itself on consciousness. This oneness is epitomised by the Soul, which stands bridging the gulf between the two extremes of Spirit and Matter. The One Soul, the Soul in each, sounds in the silence of this space – a quiet whisper that speaks of the inclusive and unconditional love at the heart of oneness.

Of course, this truth of oneness has been presented by religious and spiritual teachings since the most ancient of times, but the demands of physical survival as well as the sheer hustle and bustle of modern living have proved to be exceedingly potent distractions and diversions from more subtle realities. As has been true in past ages and still is so today, the focus on individual differences, material effects and sensory experiences can heavily veil or altogether obscure this deeper truth.

There are some images and events however, that do seem to powerfully and instantly burst through any fogs of distraction and jolt an inner recognition of human oneness. Recently there has been widespread media coverage focused on the 50<sup>th</sup> anniversary of one such momentous occurrence – the Apollo 11 moon landing in 1969. This event, viewed by millions worldwide, also provided one of the most iconic pictures of that time – an image of the Earth rising as seen from the moon. This and other similar pictures taken from space have given humanity a visual image of its oneness.

In these photographs of Earth, the One Humanity stands as a presence. Even though no individuals can be seen, the entirety is there – all humanity and all of Earth's other kingdoms are included without exception. This new perspective presents a view of overwhelming beauty and for some, these images from space have come to represent a lasting change in consciousness and a vision of a more inclusive, constructive future. The abstract concept of One Humanity finds a symbolic representation made visible in this way.

Another symbolic expression of oneness presents itself in the form of the Triangles network. This vibrant etheric mesh, like the one soul, holds all humanity within its sphere of influence. Beyond this symbolism, its radiation of light and goodwill distributes the energies essential to transform the vision of oneness from an inner truth into an outer expression of that reality.

## UPHOLDING THE VISION

Triangles workers stand as points of light within a network which is formed by their united thought and energized by their united intention. Each point, each individual, stands in wilfull radiance, a divine portal through which spiritual energy pours. This spiritual energy circulates throughout the planetary network, transforming human consciousness, healing divisions, and redirecting human activity in line with “the Vision”. This is essentially Divinity’s vision of Itself—Itself as creation—Itself as the whole. To this Vision we give the name Purpose, because it represents the ultimate goal to which all evolution on our planet proceeds.

While workers can all aspire to the spiritual sight by which such exalted revelations are possible, the majority find that their task is to anchor that which has already been revealed into the realm of human living. This mediation requires that spiritual ideas be expressed in the crucible of human living and thereby placed before the eyes of all.

This process of mediation has ever led humanity to greater heights of intellectual and social development. Throughout time, there have always been those great servers who, through tremendous effort and sacrifice, embodied the vision, upholding it before the eyes of humanity. Having borne witness to the revelation, anchored it within their minds, and radiated it in their daily lives, they became custodians of the vision and provide a guiding light for those who “still toil in darkness”.

For those who are called to seek this vision, the question naturally arises: how do servers bear witness to this vision and become its custodians? Seekers must work on three fronts to prepare themselves to serve in this way. First, the seeker works mentally, sharpening the intellect and quieting the mind so that it can steadily become a tool of both divine reception and creative expression. Second, the seeker awakens the heart and allows this to condition all creative thought, relationships, and activity. Third, the seeker stands quiet at the center—detached, dispassionate, decentralized; the will of the soul is evoked, and the seeker becomes the soul-in-manifestation. Only as the soul, can the vision be seen and upheld.

Seekers then orient themselves in two directions simultaneously: vertically, via the mind to the soul, and horizontally, with the intelligent heart directed outward in creative expression of that which the soul sees. It is only here, at the center of this dual orientation, that the seeker bears witness to the vision, becomes its custodian, enters into the New Group of World Servers, and truly upholds the vision before the eyes of humanity.

The Triangles network is exemplary of this work. Triangles is one part of the much larger Plan which seeks to manifest the Vision of God for humanity and the planet. Today, the transformation of human consciousness brought about by the Triangles network and the entire Group of World Servers is giving birth to a culture of goodness, an economy of sharing, and a politics of right relations.

# THE MANTRAM OF UNIFICATION

*(adapted)*

The souls of all are one, and I am one with them.

I seek to love, not hate;

I seek to serve and not exact due service;

I seek to heal, not hurt.

Let pain bring due reward of light and love.

Let the soul control the outer form,

And life, and all events,

And bring to light the Love

That underlies the happenings of the time.

Let vision come and insight.

Let the future stand revealed.

Let inner union demonstrate and outer cleavages be gone.

Let love prevail.

Let all people love.

Copies of this mantram are available from Triangles. Both original and adapted versions can be viewed at [www.lucistrust.org/mantrams/the\\_mantram\\_unification](http://www.lucistrust.org/mantrams/the_mantram_unification)

## THE PLANETARY NETWORK

*The planetary network of light, love and service is transforming the mental climate of the planet, reorienting humanity to spiritual attitudes and values. The groups and activities reported in the Bulletin reflect different aspects of the network.*

The WholeWorld-View Community is focused on the search for meaning and belonging, celebrating diversity within a unified whole. Its purpose is to empower conscious evolution and it supports the aim to transform the global emergency challenge into this conscious evolution.

Based on Dr. Jude Currivan's book, *The Cosmic Hologram* – the Community's message of unified reality provides practical perspectives on global problem solving, shifting

values and behaviours into harmonious alignment with the natural world, as well as universal and cosmic principles.

The WholeWorld-View Community's scientifically based perspective is reconciled with spiritual traditions and supernormal phenomena, providing an understanding of what it means to be human, the potential for evolution and the nature of reality itself.

## BRIDGING BETWEEN WORLDS

The Triangles work brings spirit and matter into a closer relationship through the power of lighted thought. There is the material world, the world of form, of objects and appearances – the world with which most people are familiar. In contrast, from the perspective of Eastern philosophy, there are “Events, circumstances, happenings and physical phenomena of every kind [which] are simply symbols of what is occurring in the inner worlds...”<sup>1</sup>.

Bridging to a higher level of consciousness is today an urgent necessity because the concrete mind and its rationalising nature are unable to find a way through the many complex problems that confront us all. The mind must be set free to soar to new heights to see the world from a higher vantage point. This freedom is developed through meditation and use of the creative imagination, bringing awareness of a higher consciousness, allowing access to the spiritual worlds and the “raincloud of knowable things”<sup>2</sup>. Therefore, the challenge for thinking humanity is to augment the intellect with the intuition, which is a higher power than the mind<sup>3</sup>. A key result of this bridging process is that it draws down from the plane of the intuition qualities such as compassion and inclusiveness.

Humanity is a bridging kingdom between the spiritual realms and the animal, plant and mineral

kingdoms. According to the Ageless Wisdom teachings, humanity’s destiny is to become the planetary light bearer bridging to a higher consciousness which can then be brought down to earth and applied to daily life. This is both an individual task and a group task with the individual bridge builder contributing to the collective bridge being constructed by humanity. Triangles workers contribute to this bridging work each day as they add their quota of light to the planetary network helping to uplift and transform human life and consciousness.

The spiritual significance of this bridging work, in the evolutionary process, is summed up with beautiful simplicity in the esoteric teachings:

To develop a station of light, through the medium of the fourth kingdom in nature, which will serve not only the planet, and not only our particular solar system, but the seven systems of which ours is one.<sup>4</sup>

This futuristic aim may lie beyond our present understanding but as the bridge to the higher worlds is imagined the amazing destiny that awaits humanity as the planetary bridge builder will become a reality.

Triangles is a world service activity in which people link in thought in groups of three to create a planetary network of Triangles of light and goodwill. Using a world prayer, the Great Invocation, they invoke light and love as a service to humanity. Further information is available on request from Triangles.

The Triangles Bulletin is for people of goodwill and is published four times a year in Dutch, English, French, German, Greek, Italian, Polish, Portuguese, Russian and Spanish. Triangles is an activity of the Lucis Trust, a non-profit educational charity which exists to promote right human relations.
