## THE ETHERIC

The etheric has been described as that which *makes all relationships possible*. In one sense, the etheric relates the individual to the planet, to the solar system and to the universe. Every form is interrelated and vast streams of energy constantly circulate throughout this universal energy field. These energies galvanise the physical plane into “activity of some kind or another, according to the nature and power of whatever type of energy may be dominating the etheric body at any particular time”.

Whilst the universal ramifications of this vast energy field are beyond our understanding, humanity, nonetheless, has a profound role to play in transforming the planetary etheric into a network of lighted triangles circulating the pure energy of love. Over a period of time, this triangular matrix will become more closely woven into the fabric of the world of form, so that humanity will become increasingly responsive to the higher impressions. It is possible that the proliferation of the communication technologies is one indication that the physical and etheric planes are becoming more closely interrelated. The ability of these new sciences to enable people to communicate with and relate to each other in real time without the impediments of space and time are quite probably a reflection of the roles that telepathy and the intuition will play as the race unfolds. As we move into an era where right values, and notably the intuition, are developed simplicity (in a spiritual sense) and freedom from the complexities of the lower mind will gradually become the norm.

In the world today the outer form is still largely unable to convey the beauty and the purity of the Aquarian impulse. Spiritual philosophy reminds us that *all forms exist in order to express truth*. As light and goodwill fuse and blend within the Triangles network lighted goodwill is projected into the world of form. These transformative energies are impressing human minds with the visionary and noble ideas that are instrumental in shaping the *new heavens and the new earth*. A pattern of right relationships to that which is above and to that which is below dawns, heralding the bridging of the inner and the outer worlds.

The ‘discovery’ or rather acknowledgment of the existence of the etheric planes beckons. It probably will not be many years before visionary scientists make a breakthrough into these subtler realms auguring a new era in the study and use of energy, magnetism and radiation for the benefit of the whole.

Our inner work together is expanding our awareness from a purely human perspective to embrace our responsibilities to the planet, and to all the kingdoms in nature.

## REFLECTIONS ON THE ETHERIC

---

There is nothing in the manifested universe—solar, planetary or the various kingdoms in nature—which does not possess an energy form, subtle and intangible yet substantial, which controls, governs and conditions the outer physical body. This is the etheric body.

Alice Bailey

Aether is a universal matrix from which spring many active currents ... And in turn these active currents are the cause of the elements of Air, Fire, Water and Earth and the labyrinth of created forms.

Aether: The Transcript

The etheric levels of the plane will be full of an increased activity, and slowly but surely, as the decades slip away, man will become conscious of these levels, and aware of their inhabitants. The immediate effect of this greater etheric energy will be that a numerically larger number of people will possess etheric vision, and will be able normally and naturally to live consciously on etheric levels. The majority of men only function consciously on the three lower levels of the physical—the gaseous, the liquid, and the dense—and the etheric levels are as sealed to them as are the astral. In the coming centuries, man's normal habitat will be the entire physical plane up to, though not including, the second subplane. The fourth and third etheric levels will be as familiar to him as the usual physical landscape to which he is now accustomed.

The centre of attention of medical and scientific students will be focussed on the etheric body, and the dependence of the physical body upon the etheric body will be recognised. This will change the attitude of the medical profession, and magnetic healing and vibratory stimulation will supersede the present methods of surgery and drug assimilation. Man's vision being then normally etheric, will have the effect of forcing

him to recognise that which is now called the "unseen world," or the superphysical. Men in their etheric bodies will be noted, and communicated with, and the devas and elementals of the ethers will be studied and recognised. When this is so, then the true use of ceremonial ritual as a protection and safeguard to man will assume its right place.

Alice Bailey

... the aetheric body manifests itself through movements, the hidden movements within living beings ... circulation of the blood, the movement of sap within trees ... the Aetheric is about rhythm and time.

Aether: The Transcript

Awareness of the Aether is what's crucially missing from our present Western science and culture. And this 'absence' is at the heart and root of many of our problems, great and small.

The etheric or energy body, therefore, of every human being is an integral part of the etheric body of the planet itself and consequently of the solar system. Through this medium, every human being is basically related to every other expression of the Divine Life, minute or great. The function of the etheric body is to receive energy impulses and to be swept into activity by these impulses, or streams of force, emanating from some originating source or other. The etheric body is in reality naught but energy. It is composed of myriads of threads of force or tiny streams of energy, held in relation to the emotional and mental bodies and to the soul by their coordinating effect. These streams of energy, in their turn, have an effect on the physical body and swing it into activity of some kind or another, according to the nature and power of whatever type of energy may be dominating the etheric body at any particular time.

### **Aether: Knowledge is Power**

The book *Aether: The Transcript* is a compilation of the collected thoughts of independent-minded scientists, artists, healers and teachers. The author of the book writes: “This project arose from a lifelong fascination with the whole idea of the Aether, which seems to be there, under different names in all cultures worldwide. It goes way back beyond history. It's a vast, unlimited subject but you have to start somewhere. This work is such a start.”

The book sprang from a series of recorded interviews with spiritual thinkers from diverse backgrounds.

Some of the topics discussed include: The Aether, Wholeness, Polarity, Consciousness, Light and Darkness, Levity and Gravity, Quantum and the Unquantifiable, Chaos and Cosmos, Evolution and Involution, Conclusions and Recommendations....

*Aether: The Transcript* is available as a book, CD-ROM, or as an e-Book in PDF format.

### **Aether Foundation**

The Aether Foundation was founded in 1992 in France and focuses on 'non-conventional energies and discoveries noted since Antiquity'.

The purpose of the Foundation is: “to spread definitively light upon the nature of what has been called in the past ‘5th element’ and to promote a progressive integration of this knowledge in the concerned human field activities. Its aim is to develop a new point of view about the phenomena

of our physical world and to give rational scientific thought concrete keys to reach a more intimate understanding of the realms of nature and the forces that direct it. Certain words are used today to describe this approach, like ‘Naturalist Science’ or ‘Natural Physics’. We are speaking here about an innovative way to observe, think, and respect the world, that is to say to link and to fuse intuition – the world of ideas – with the analytical mind, which levels of consciousness the Orientals called *Buddhi* and *Manas*, and the modern psychology calls the cerebral pair or right and left brain.”

The Foundation works through two main agencies: *The International University* and the *Research Center*.

The University offers two types of correspondence courses – the 3-year cycle and the longer 5-year cycle. Courses are downloaded in PDF format. (Please note that the course material is written in French but study work can be submitted in English).

The Research Center is dedicated “to fundamental research in the Aether or Ether field, to public information via the website, and to the development of useful technologies based on these new paradigms”.

### **The Radionic Association**

The Association will be holding a conference between 11-13 October at the following venue in the UK:

Poundon House, Poundon, Bicester, OX27 9BB  
([www.poundonhouse.com](http://www.poundonhouse.com))

The theme of the conference is: ‘Energy Medicine in the Aquarian Age’. Further details can be found at:

We are usually unaware how much our behaviour and life patterns are conditioned by ideas. Yet from time to time a crisis forces us to wake up and recognise them for what they are. Humanity is going through just such a crisis now. We have to understand what ideas have led to the crisis and we need to grasp the new set of ideas that will inspire us to make the necessary changes and lead us into a better balanced world. This is the familiar pattern of human experience that lies behind the phrase 'an idea whose time has come'. We might imagine such ideas as hovering behind the scenes watching the unfolding events of the world, waiting for the right moment to incarnate and fulfil their purposes. This is a correct if rather picturesque way of describing Patanjali's 'raincloud of knowable things' from which ideas are precipitated in response to the sequential demands of human crises.

From this and for our encouragement, we can infer that there is no crisis without a solution! But will we take the newly illumined path? Or will we try to continue in the business-as-usual mode, hoping that the crisis will go away? These questions indicate the truth that every crisis is really a test of our ability to discriminate, to make the correct

decision and act on it with a newly enlightened mind. Again for our encouragement, we can observe that increasing numbers of people are putting into practise the idea that goodwill and cooperation must supplant the old paradigm of personality competition. Another example lies in the global economic crisis. Growing numbers of people and specialist groups are realising the truth that an ever-expanding global consumption-based economy is destined to fail. Many are now helping to construct and magnetise the soon-to-be mainstream idea that humanity should live within our planet's resource constraints, and serve all life forms on the planet, rather than thoughtlessly exploiting them.

The Triangles network, built as it is on the geometric structure of soul values and relationships, is a marvellous tool to help grasp the new ideas that are percolating down from the intuition, and turn them into clear, radiant thoughtforms. Our daily visualisation of this network of lighted love helps us all to think through the many new constructive ideas, seeding the mind of humanity with their livingness and soul quality, and participating in building a world of right relationships.

Triangles is a world service activity in which people link in thought in groups of three to create a planetary network of Triangles of light and goodwill. Using a world prayer, the Great Invocation, they invoke light and love as a service to humanity. Further information is available on request from Triangles.

The Triangles Bulletin is for men and women of goodwill and is published four times a year in Czech, Danish, Dutch, English, Farsi, French, German, Greek, Italian, Polish, Portuguese, Russian, Spanish and Swedish. Triangles is an activity of the Lucis Trust, a non-profit educational charity which exists to promote right human relations.
