

## The Discovery of the Point within the Circle

“Of form and of consciousness, the circle and the point are the natural symbols. This applies equally to the atom, to man, to the planet and to the solar system.” (*Discipleship in the New Age II*, p. 250)

“At this Middle Point there is a coming and a going; there is relation and contact; there is increased opportunity and inspiration; there are focal points of transmutation, of transition and of transformation. It is towards this area of merging and of fusion that you are now asked to move.” (*Discipleship in the New Age II*, pp. 609-610)
