

The Promise of Triangles

Kathy Newburn

Hello everyone and welcome to our Triangles meditation group webinar. We meet each month to introduce the planetary service of Triangles and to provide a platform for those people who are already members of Triangles to join together to support and strengthen this planetary service. Triangles is a daily visualization technique using the power of thought in which three people agree to join together, visualizing a golden triangle linking them. They then link their Triangle with the thousands of other Triangles members throughout the world, visualizing the planet surrounded by a network of light. They then sound the Great Invocation, a world prayer through which the energies are distributed. Triangles is essentially a powerful tool of planetary transformation.

We also use this as an opportunity to expand the network through the creation of new triangles. If you would like to form a triangle you can place your name in the chat box and hopefully others will reach out to you. If you would like to learn more about how to do this work you can download the file in the chat box. If you would like to help generate interest in the work of Triangles, you can wear a Triangles pin. Please put your name in the chat box if you'd like to help in this way. The June or Gemini full moon is celebrated also as World Invocation Day. The Goodwill webinar at the end of the month will focus on preparing subjectively for this event. World Goodwill has prepared a Toolkit for those who would like to help make this day more widely known. This can also be found in the chat.

After our first visualization we will hear from our guest today, Uta Gabbay from Germany, who will be sharing on the theme of "The Creative Power of Triangles." She will share about creative triangles between individuals, groups and nations.

Through Triangles and in our webinar, we come together to generate a magnetic aura upon which higher impressions can play—invigorating the group life. At this time of year we work under the overshadowing influence of the higher interlude period of the spiritual year when the major planetary triangle is stimulated—the triangle between the planetary head center, Shamballa, the planetary heart center, the Spiritual Hierarchy and the planet throat center, Humanity, represented by the three great Lords, the Planetary Logos, the Buddha and the Christ. Under the present energy of Taurus, the center Shamballa and the influx of the spiritual will are key conditioning factors. It's said that the constellation Taurus is the most influential of all the twelve in conditioning our planet, focalized around the Wesak Festival which occurred 10 days ago.

According to the teachings of esoteric astrology Triangles condition at all layers of consciousness and this point will be highlighted by Uta. Taurus brings in the most powerful triangular influence impacting planetary evolution – that between the Great Bear, the Pleiades and Taurus. This triangle then pours in through our Sun and is focalized by the first ray planet Pluto and our Earth. Taurus, being a sign of light—of enlightenment and illumination, makes this triangle one that impacts powerfully upon the planetary etheric body, releasing abundant light and energetic stimulation throughout the network.

The time between the Taurus and Gemini full moon periods is known in the teachings as the Holy Month. This is the major interlude of the spiritual year, a contemplative time in which we are asked to pause and do what we can to hold our alignment and seek to cooperate with the Great Ones in preparation for the outpouring of Love that occurs at the Gemini Festival.

It's a good time to remind ourselves of the power of the Triangles work. In the Bailey teachings we learn that in the 1930s a small group of students were asked to use the Great Invocation with focused intent and that if they were able to do so, aligning with the Great Lives standing behind planetary evolution, that the second World War would be prevented from precipitating onto the physical plane. The group failed because they were too focused on themselves instead of on love and need of humanity. Triangles workers today can hold the potency of this Triangles work in mind as we approach the Gemini Festival and through the upcoming full moons as we build towards the Festival Week in Capricorn.

Through our work together in Triangles we aid the evolutionary shift occurring in the life of the Planetary Logos, playing our part in enlivening His brain cells of which we form a part. Triangles workers and all people of loving spiritual intention compose what could be described as a type of leaven within the body of Humanity. As you know, only a small amount of yeast is needed to raise a loaf of bread, so, too, we do not need so many people--relatively speaking-- to bring about the needed shift towards the light.

As we work together in triangles our radiatory capacity is exponentially magnified. The effects or outer form that this radiatory activity assumes within our daily lives is expressed through the activities we undertake and the words we use within our sphere of activity. But the real, essential work in which we are engaged lies within the realm of consciousness.

Triangles work is founded upon the recognition that we work as part of and within a vast network of light weavers that are energetically linked and this linking extends from the highest to the lowest -- from the great Lives in Whom we Live and Move and have our Being to the smallest sub-atomic particles that make up ourselves and all life forms. Within all these various streams of consciousness contained within the radiating spheres that are the various kingdoms in nature, a vast merging and blending is taking place. In cooperation with the great Lives our work contributes to the shift in which "darkness giving place to light, as the Sun of Knowledge arises and dispels the darkness of ignorance" (*A Treatise on Cosmic Fire*, 1130).

Not all planetary cycles are the same in terms of their radiator activity. Some cycles are more radiatory than others. It's said that the period we are now in is one in which humanity will achieve a larger sphere of radiation than has occurred in a long time. It is a time when we will begin to transcend our human limitations and become better able to enter into the fifth kingdom in nature. There have been a number of such periods—there was a major one in ancient Atlantis wherein several hundreds of people were able to pass out of the human kingdom into the kingdom of God. During the time of the Buddha there was another such period wherein because of the intense radiation many chelas achieved arhatship. This was called "a cycle of the third degree." The radiation at the time of the Christ lasted several hundred years but since the 14th century, the radiatory influence has been increasing and we

are now moving into a period which will surpass even the radiatory influence that occurred at the time of the Buddha.

So let us work now together with our visualisation, doing our part in illumining human consciousness and radiating light.

THE END
