

**World Invocation Day: Invoking energies of Light and Goodwill
in Response to Human Need**

Steve Nation

Welcome friends to this Triangles webinar for Monday, June 8, 2026. It is a joy to be together again to shine a light on the work we share through the Triangles network.

My name is Steve Nation and it is my pleasure to host the broadcast today. As most of you will know, the network is serviced by three centers, three offices, in London, Geneva and New York – each responsible for specific regions, working together as one global network; one movement of organized meditation and prayer to invoke and radiate the lighted, loving energies of divinity – joining with all movements that truly seek to work subjectively to infuse human consciousness with the potencies of the soul or Buddha nature.

Today we are working within the radiatory aura of World Invocation Day which took place just over a week ago on the day of the Gemini full moon, on Sunday, May 31st. And later in this broadcast we will be joined by our special guest, long-term Triangles worker, and psychotherapist/counsellor, Susan MacNeill, Drawing on her studies of the ageless wisdom and her extensive experience of over 30 years work as a counselor she will reflect on themes of World Invocation Day, Gemini and the Great Invocation – so we can look forward to that!

Triangles is a very practical method of group work, using meditation as a tool for world service. And with this in mind, following some introductory thoughts we will work together with a visualisation on the Great Invocation – we use this visualisation every month, so most of you will already be familiar with it, which is helpful. This will be followed by Susan's reflections and then there will be time for discussion and questions to Susan. You can post comments or questions in the chat box, and use the 'raise hand' function in Zoom to speak directly to Susan and the group. The webinar will conclude with the meditation *Energizing the Planetary Network of Triangles*.

One of the goals of these webinars is to provide a space where people who are new to the Triangles practice, and to the network, can get a feel for the work, and find out more about what motivates us. It is important to emphasize that Triangles is, in essence, a simple and straightforward exercise open to any and all who understand and value the role that the contemplative arts (meditation, prayer, visualisation) play in contributing to the overall uplift and transformation of the collective environment of human thoughts and feelings. It is a simple technique where participants link in thought every day, for a brief moment with the souls of two other people. Over time, what we can think of as a vivification and a deepening of the Triangle often takes place. The link is with the core divinity at the heart of

your two partners – and they are linking with this aspect of yourself. Initially this is a simple visualisation, but over time the image of the lighted triangle of three souls, consciously linked, becomes real, solid and alive – a living triangle of purpose dedicated to the service of humanity and to the deep human need to connect with that higher or deeper sense of Self that is honored in all religions and all spiritual paths. The living triangle (or triangles) that have been built by participants all intersect and interact with other triangles to form a net of triangles – often depicted as a geodesic dome, alive with points of connection. And the daily practice concludes with the vitally important act of sounding the Great Invocation.

This use of the Great Invocation is really the core of the Triangles work, and Susan will be speaking in a deeper way of this later. The network of myriad lighted, living Triangles performs an energetic function in the subtle body of humanity, conditioning the mental and feeling atmosphere by constantly and rhythmically invoking and calling forth the healing presence of the lighted, loving energies of divinity.

We are all of us living through a time of chaos and crisis in human affairs. It is as if the most fundamental human challenge to live a good and meaningful life is being tested – individuals and families in every part of the world are under pressure – having to think for themselves free of all the contradictory messaging flowing through the collective psyche – and called to find the solidity of faith and the essential goodness at the core of the spiritual self. As Triangles workers our task is to work with the despair and heart-felt cry that is such a feature of this time, lifting it into the focused, concentrated cry of the Great invocation for Light and Love and Spiritual Power to flow into the mind and the heart of the human.

As a practical tool for service, and a way of working as a group with a concentrated invocation to the light, Triangles is open to and includes followers of many different spiritual paths – unified in the universal call to the Light and the Love of the One in Whom We Live and Move and have our being – however we may understand that One. And yet the movement and the practice has come from a specific approach to the Ageless Wisdom as found in the teachings in the Alice Bailey writings – and so the heart of the network is centered around specific esoteric understandings of the nature of the triangle and of the trinity of energies that underlie both the outer material world and the inner world of spirit, soul, mind and heart.
