

TRIANGLES OF LIVING ENERGY

Welcome everyone and thank you for joining with us today on this Triangles webinar on this second day of distribution of the Aries full moon.

Let's now take a moment to link with the worldwide group of all Triangles members, followed by the sounding of the Noontime Recollection.

We know O Lord of Life and Love about the need, touch our hearts anew with love, that we, too, may love and give.

We would like to extend a special greeting to those of you who are new to the work of Triangles and hope that after learning more about this planetary service, you will be encouraged to form a Triangle. Through this means you will join with the thousands of individuals throughout the world who are using the power of thought to help raise the vibratory rate of the planet and uplift and transform consciousness. If anyone would like to find Triangles partners, whether for your first triangle or for an additional one, please place your name in the chat box.

In the chat box you will also find a brief outline of how to do the work of Triangles that is suggestive and which can serve as an outline to be adapted by each triangle partner. Simply stated, Triangles involves finding two other people to link up with each day by visualizing a golden lighted triangle connecting the three of you. You then link your triangle with all other triangles throughout the world and visualize the planet surrounded by a golden, lighted, radiating network of Triangles—the triangle being the symbol of the soul.. The work is completed by sounding the Great Invocation, a world prayer that serves to release and circulate the contacted energies.

At the beginning of each new precessional age, a 2160 year cycle, the energies impacting the planet shift. This shift is a gradual process covering a 500 year period in which the energies of the previous age pass out and blend with the new and incoming energies. This shift brings in a new governing ray, constellation and planetary rulers. The new and incoming energies include Aquarius, the seventh ray and the planetary rulers of Uranus and Jupiter, the seventh and second ray planets. Aquarius is also overshadowed by the Fifth Ray, making the new age scientific, but a science which will be based on a deepened understanding of the subjective factors underlying this outer world.

One of the primary objectives of the Triangles work is to prepare human consciousness for the return of the World Teacher, the Christ. At the beginning of each new age a Teacher steps forward and stands as the focalizing and transmuting agent for the new energies. This Teacher will be an embodiment of the new energies. In past ages, this focalizing Teacher had few members of the human kingdom who were sufficiently evolved to be able to cooperate with the released energies. Today, the situation is dramatically changed and this time the Teacher will be accompanied by an enlightened group of individuals, as well as a trained group, the new group of world servers, who will cooperate in transmuting the incoming energies so they can reach out to encompass the entire world. Now is the time that humanity has within its hands the ability to call forth the return of this Teacher if it acts unitedly and with focused intent.

There is another purpose underlying Triangles, one that contributes to an even larger purpose within the trajectory of planetary evolution—that task being to help make the planet sacred.—or a planet in which the planetary soul is controlling. Technically speaking a sacred planet is defined as one in which the planetary Logos has taken a cosmic initiation. Our Logos is in process of realizing that achievement and subjectively speaking is said to have already done so. A key factor necessary for this achievement is an awakening within the human kingdom—the third point within the planetary triangle. It is through humanity and the externalizing Masters of the Wisdom that spiritual energies can be anchored in form. This finds its parallel within the initiatory process of a human being wherein the human initiations must be taken within a physical body. The Aquarian energies are facilitating this process on a wider scale than ever before possible as this is an energy that is qualified by group work and the accompanying seventh ray brings together spirit and matter. One of the objectives of the coming age is to establish, within the human kingdom, a station of light that will have wide-reaching implications for the planet, the solar system and the cosmos.

The Triangles extends well beyond the human kingdom. It is rather an outgrowth of the triangular work undertaken by the Great Lives Who inform not only the planets, but more broadly, the constellational Lives and great groupings of stars that combine in triangular formations throughout the cosmos who are ceaselessly working to transmute and transmit energies throughout all systems great and small. It is we who are cooperating within this broader effort.

Right now one such major triangular configuration impacting our planetary Logos is being highlighted when the sun is in Aries. It's said to be a configuration that is a macrocosmic reflection of the five conditioning ray energies of the Logos Himself. We could say it is always functioning but during Aries it comes under a potent vibratory stimulation. If we take the time to study this diagram we will see that it is a powerful first ray energy transmission. The energy moves from a first ray fixed star in the Great Bear through Aries, a first ray constellation, into the orb of our Logos who is governed by the first ray at the highest level which then stimulates a triangle formed between earth and the two first ray planets—Vulcan and Pluto. Yet it is helpful to always keep in mind that because our solar system is decidedly second ray we can see the potency of the divine love which this time ushers in not only for the Logos but through all the cells within His body of expression which include ourselves.

Two thousand years ago Christ ushered in the Piscean Age and anchored the energies of love and service. He now comes to bring the fires of love as His link with the Father and the center Shamballa has been more firmly established. Through the work of spiritual activities such as Triangles we become part of this living process of preparing human consciousness for the release of these fiery energies of love.
