

Some have suggested a possibility that the Earth forms the kundalini or base center within the body of the Solar Logos. - The thought is that as the base awakens, so, too, does the entire system; hence the ferocity of the battle of forces contending for the control of the planet at this time. For this battle has implications that are systemic in nature, extending beyond the confines of this planet alone. And while there is no doubt that the forces of light will be victorious, that has been determined, extended delays in the process are not without their problems. Yet the dharma of our Earth is that liberation comes through pain and struggle – our Logos is called “the Great Sacrifice” and the Great Lives who oversee our evolutionary progress are said to achieve their goals by “battling with a dragon.” So, we, too, in our little lives, can likewise often find our lives conditioned by a similar quality.

The present awakening of the Earth and its implications within the system as a whole helps to explain the reason for the tremendous stimulation that is occurring on our planet at this time. This stimulation is at once offering up opportunity for rapid advancement for increasing numbers of people whose lives and work have aligned themselves with the forward tide of evolutionary progress. But there are real challenges involved in following that path that can result in overstimulation and consequent imbalances. It is therefore necessary to cultivate caution and wise spiritual practices in order to hold the alignment (maintain some balance) at this time.

As the will aspect awakens on our planet we know it is part of a larger process of initiatory activity that is galvanizing the whole system. This shift and the consequent increased contribution of planet Earth to the greater whole is related to the fact that we are becoming a sacred planet—a process to which all Triangles workers are contributing. And while this shift will take much time to be realized, on the inner planes it has already occurred and we are in the midst of the long process of precipitating that sacredness through the breaking down of crystallized structures and the subsequent bringing in of the new and emerging forms through our growing intuitive responsiveness.

The network of Triangles workers facilitates this goal for the triangle is the symbol for the soul. The Triangle facilitates the smoother flow of energy to the whole disrupting and bisecting the present network of squares, thus freeing up blockages and bringing about an increased flow of light and goodwill. So, don't be a square, be a Triangle.
