

## **From Squares to Triangles: The Science of Etheric Structure or Substance**

Maya Costley

“The mother is saved by the birth of her son”-Old Commentary

There is a radical initiative being implemented on Earth, guided by those who are among the Spiritual Hierarchy and Shamballa, “Where the Will of God is Known,” who are tasked with this particular responsibility. But, for the first time in human history, humanity via the New Group of World Servers, is also now ready and able to join in this planetary effort and begin to add its share to this important redemptive work, on a significant scale. This work and service is called, “The Science of Triangles, or The Science of Etheric Structure and Substance.”

This work supports the in-coming Aquarian ideals seeking manifestation and is a scientific approach to planetary redemption. The work of Triangles is an esoteric science because it uses specific techniques and when used correctly can make real and lasting changes to the etheric field of the planet. Through this science, Hierarchy and the New Group of World Servers are rebuilding the etheric field of the planet, from the current pattern of squares to one of triangles. This will result in the transformation of all manifested life on Earth.

How is it possible to redeem and transform Earth through the imposition of triangles onto the etheric field? Why is it so important at this time in the history of the planet, to do this work of triangles? Why is the etheric structure of the planet being changed from squares to triangles? And why is the work being centered on the etheric level, for this transformation to take place? These questions help us to understand the significance of the times we are living in and the profound opportunity we have to do this work. Through the use of the powerful tool of Triangles we can assist in bringing about important and needed changes on Earth.

The square is a universal geometric symbol that represents a deeper reality and truth, about the Will of God as it seeks expression through matter. A deeper understanding of the symbol can be likened to a building with its 4 walls, or the shape of a cube, a structure found in nature as in a grain of salt. It is a symbol for stability, groundedness and material expression. But, in terms of consciousness, it translates as a deeply material and matter-bound relationship to life.

We are told that in the previous incarnation of this planet the goal was the mastery of material expression and the etheric structure of the planet was built on a geometric

pattern of squares to support this development in consciousness. Once this goal was reached and the life dwelling within the planet mastered His material expression, like a shoe that is too small for a child's foot, it became restricting and no longer supported the continuing evolution of His consciousness.

In the current incarnation of the planetary life, the newer consciousness seeking expression can be represented by the symbol of the triangle. It is the marriage of spirit and matter. It is seen as the relationship between the mother and the father, which results in the birth of the child, the Christ Consciousness. Within humanity it is the consciousness of "Right Human Relationship," of this Christ consciousness manifested through the human kingdom. The new ideal of the Love of God demonstrated and manifested on Earth.

This newer consciousness being brought into manifestation will redeem the Earth by allowing the energy of love to flow more freely. It will also allow the lives on Earth to build new structures and new forms to represent and contain this newer consciousness. To do this it must start first from the subtler levels, because energy follows thought. The etheric field is the lowest level of the mind of God, as it seeks to condition matter. This initiative is being organized because it is the overarching goal of the Aquarian Age to demonstrate Right Human Relations and Group Consciousness, on all levels of planetary life.

The work of triangles is a mental science that involves the use of the trained mind to visualize a lighted web of energy across the planet. The power of the human mind to visualize is one of the gifts of God and signals that we have a role to serve in the greater life of the planet. Trained meditators are the Ajna center of the planet, the third eye, which represents the capacity to visualize and bring the visions of God's Will via the Hierarchy into manifestation. Now that humanity is capable of doing this, Hierarchy formed the New Group of World Servers and they are being trained to serve this necessary role in the work of planetary redemption.

The work of triangles is also a linking and bridging work because the triangle creates a synergistic relationship and power that can generate light. By this generated light the etheric field through the power of the mind, is being rebuilt. The etheric web is composed of the thought by those that have the ability to meditate and have the awareness and understanding of Hierarchy's effort to manifest the Will of God. They are helping to manifest that will in matter. The "mother" is the intelligent and responsive element of matter. It receives that will or blueprint, meditated by the minds of Hierarchy and the New Group of World Servers and manifests it.

The triangle represents the consciousness and love aspect descending into matter. This is possible in two ways. Because the triangle can be either upright, with the point pointing up, or with the point pointing downward. It represents the two ways this rebuilding of the planet will come about. The downward pointing triangle represents the destructive nature of this redemptive energy, that descends from Shamballa to clear out the old thoughtforms and mental and etheric structures, that must be cleared so that the newer consciousness, ideas and ideal forms can be built.

The upwards pointing triangle represents the building or constructive aspect of these Shamballic or will forces, which provides the blueprint on which the new structures will be built. Destruction and construction. The two triangles merge together to form the 6 pointed star, the symbol of spirit or the Will of God, descended and manifested into and through matter. The perfect relationship and perfect balance of these energies of spirit and matter. This formation of energy by thought and the expression of the Christ consciousness through matter, is the Plan on Earth.

As members of the New Group of World servers, it is our privilege and responsibility to answer the call to this radical and transformative opportunity, to make a significant contribution to planetary redemption. Because the New Group is now a center of force on the planet, and by the collective power of the group meditation, it has now made contact with Shamballic energy and can safely transmit it to humanity and the lower kingdoms, thereby fulfilling its destiny as a chakra in the body of God. This capability is needed to create a triangle between Shamballa, Hierarchy and Humanity and create the needed channel for this Will energy to redeem and transform matter. This is an evolutionary advancement for humanity.

The Tibetan has said, "Do you realize the significance of this?" This question is necessarily provocative, because he is attempting to awaken us to the role we can play in this work and the opportunity to do it at this crucial time. The transition between the Aquarian and the Piscean age provides us an opportunity because of the newer Aquarian energies coming in, of group consciousness and group thought which can create the needed cooperation that a large-scale group initiative needs to make a real impact in this work.

By being trained to do the work of Triangles and add our daily meditative efforts to the performing of it, we are making a significant contribution to the goals of bringing in the New Age. As Margaret Mead said, "Never underestimate the power of a small group of people to change the world. In fact, it is the only thing that ever has." Your willingness to be here, to learn about triangles, to form them together and do this necessary and

important redemptive work daily will change the world. This is the way of the future and we are that small group of people willing to do it.
