

**“The Beneficence of God; and that through the Intricate combinations of cosmic, systemic, and planetary triangles, the purposes of God are working out.** It is through these relationships that love expresses itself, brings about the needed changes for that expression, and human consciousness is brought into the required state of inclusiveness.” (ES. p. 477)

Hi, Kathy, and everyone who is deciding to join us on this Memorial Day holiday. Thank you for inviting me to return to speak again and discuss this fascinating topic of triangles. The last time I was here, I chose to speak about the “why” Triangles work. I wanted to shed a little light on the question of why Triangles work exists, and why we might want to participate in it. Why are we doing this meditation focused on the practice of visualizing triangles of light within the etheric, or energetic field of earth, and what is the hoped-for effect of doing it? The talk was titled, “From Squares to Triangles: the science of etheric structure of substance.”

We discussed the reorientation of the etheric pattern of the planet, from one of squares, to one of triangles. We looked at the work of Triangles, and how the energy grid of the planet is essentially being “rewired.” Through it. We also looked at how this effort was being made, so that consciousness could be manifested, or Christ consciousness specifically, on earth. That this was an evolutionary development for the planet, and that through this work of Triangles, we are being given an opportunity to participate in this hierarchical work according to the Plan.

Now, I would like to focus on the idea of “who” is doing this Triangles work? This question of who is an interesting one, because it takes it out of a focus on just us potentially and pulls it much further back, to looking at this science and with a wider lens and seeing how truly universal this work is. That is the hoped for effect at least, because it would highlight that the agenda of developing consciousness, or the Christ Principle specifically, is not isolated to earth alone.

“Energy follows thought” is a universal law, which is the way that the Will of God is working out in the universe through the Mind of God, through His universal language of symbols. The triangle is a universal symbol for Christ consciousness, and as esoteric workers in mental matter, we now have the privilege and opportunity to join in this group work for the first time in human history. The human kingdom has developed enough mental polarization that we can contribute to this planetary work of redemption.

Triangles work is not a new technique or work. It is a cosmic phenomenon of God’s Will working out on the mental plane through the expression of triangles, in matter. Through

the Tibetan's introduction of the Science of Triangles in his work with Alice Bailey, we are now being given the opportunity to train ourselves to join in this science of cosmic redemption. The whole universe; constellations, suns and planets and participating in one triangle relationship or another. These are Triangles of redemption, of the matter aspect of manifested life, and all have roles to play in them, as either receivers or givers of divine energy.

Triangles, in fact, are an aspect of the one true and original Triangle; that of God the unmanifest, God the manifest, and as the principle of the Cosmic Christ as He seeks to bring these two closer together. Triangles can be seen at every level of evolution that can be observed: cosmically, systemically and on our planet Earth. There is the divine triangle of the Buddha, the Spirit of Peace, and the Avatar of Synthesis working in the same way on our planet and in our Triangle work we are seeking to be one tiny aspect of that greater triangle's efforts.

It is also through this triangle that the will of the logos is seeking expression on our planet, and within all planetary kingdoms, particularly through the human. Humanity has the spark of mind, and in that divine gift we have the potential to make great contributions to the evolution of the planet. It is through the work of Triangles that the Christ, "is the divine center in every human heart (and it is) from the high place where the Coming One awaits. It is only the united demand of humanity, its massed intent, which can precipitate the descent of an Avatar" (Reappearance of the Christ, p. 9)

We as humanity are the "Sons of Fire" and of mind, and as the New Group World Servers we can help in the reappearance of Christ on earth. Triangles are a divine symbol that represent the soul in manifestation through all the lives, and in all the forms, in which it manifests. They are the Christ, sounding the note of love through those forms, and form a triangle of divine energy. Triangles tune humanity to Christ's divine frequency, and He will continue to sound that note until every one of us is in resonance with Him. We must try to "tune" our frequency and the frequency of humanity to His, and enable His return through the work of Triangles.

We must prepare the way and make "all paths straight," for his return through this work. "Transferring human consciousness from the personality to the higher cosmic etheric levels of the spiritual triad," is the work of Triangles. It is through the Spiritual Triad's descent into matter, and by that descent, that the resurrection of matter is achieved. The salvation of the form life can be hastened through Triangles. This descent of the energy of love does result in trials and testing of the desire-nature, but through that the higher aspects of love can be revealed.

As we head into the coming “Festival of Humanity and of the Christ,” and “World Invocation Day,” let us see the testing and trails that we and the rest of humanity are facing as an opportunity, and renew our commitment to join in this work of Triangles so that as a member of humanity we can hasten Christ’s Reappearance on Earth.

Thank you.
