

The Triangles Network

Welcome to the Triangles webinar this 16th of July, 2018. The Webinar seeks to make an active, factual, current group contribution to the reconstruction, readjustment, recreation and strengthening of the planetary network. Triangles uses the power of focused group thought to illuminate and transform the earlier forms of etheric squares and rectangular patterns into radiant triangles of light and goodwill. The triangle work derives its strength and transforming power from its simplicity.

For those who are new to the group work, the Triangle work “has been described as an activity whereby a network of light and goodwill covering the entire planet is created and maintained “. The process involved in forming a triangle of light is simple. “Each individual links in thought and purpose with the other two members of the triangle, or triangles seeing the vital energies of light and goodwill circulating from point to point. The person then directs the flow of energy into the network, clearly visualizing the radiant worldwide network of Triangles, of which his or her own triangle is a part. The individual then repeats the Great Invocation with concentration and intention.”

The Members of each triangle need not do the work simultaneously as the work is synchronized by the common purpose and the intention that motivates the work. The Triangle network is activated and vitalized by the daily work of each individual member.

The opportunities are limitless and students and coworkers already participating and engaged in the Triangles work are encouraged to form new triangles. In fact the meditation we use in this weekly group webinar includes a stage visualizing more triangles being formed. This way we add to the quality and strength and the expansion of the work.

The Triangles work is a practical application of the occult law that “energy follows Thought“. The cumulative effects of focused group thought are today transforming the world. And Triangle workers bring a concentrated energy through the use of the Great Invocation to direct progressive human capacities and influence global movements into greater light and understanding relationship.

We are not in a position to measure and identify the direct effects and results of Triangles work done over the decades but we all have witnessed great positive changes that border on the miraculous, and Triangles workers may take heart in the ongoing rapid changes taking place every day. Therefore with enthusiasm and faith we proceed with surety to add our quota of energy to the resonating sound of the various group activities taking place all over the world

Thus do we transform the old patterns of rectangles into vibrant brilliant triangles which are better conductors and channels for the energies of goodwill, light and love needed in the world.

The seeming simplicity of the Triangles work belies its significance. The work is said to be dear to the Hierarchy and close to the heart of the World Teacher, the Christ with all the profound

implications involved. The Triangles work that we are doing is also a great bridging work, linking between old planetary pattern of rectangles and future patterns of interlaced circles that will evolve in future eons. Therefore in a sense all Triangles workers are contributing to the construction of a sort of “lighted bridge to the future”.

The origins of the Triangles work are also steeped in the profound task of relating humanity’s personality consciousness to the activity of Triadal livingness. Through this apparently simple work, we daily strengthen the mechanism for light and love and simultaneously increase the reception of “the life more abundantly”. Through the Triangles work we qualify and condition the planetary etheric vehicle to become a better transmitter of all the inpouring energies. Energies of light, love, and the will-to-good are distributed and circulated, thereby helping lift human consciousness and speeding up the return of the World Teacher, the Christ as well as aiding in creating those conditions that will eventually reveal the nature of deity and the glory of the Lord.

For anyone new to the work of Triangles and sympathetic and interested in participating in this type of service through the power of thought and who is looking for partners to form a triangle then please use the “Form a Triangle Online” service on the Lucis Trust website:
www.lucistrust.org/triangles/triangle_online_questionnaire

When you form a triangle we would very much appreciate if you register it at www.triangles.org.
