TRIANGLES:

A TECHNIQUE OF PLANETARY HEALING

Triangles of light and goodwill are formed by three people who agree to spend a few minutes each day visualizing themselves connected by threads of light and goodwill. The triangle lights up as attention is placed upon it, attracting greater light and love into the world. Each person then visualises the energies streaming out across the network of triangles, creating a subtle communication grid that helps transform the atmosphere of human thought and relationship. Triangles partners may be across the street, or on the other side of the world.
