# Festival Week of the New Group of World Servers Seminar 2019

All who love humanity and the Earth and who express that love through lives of active service form one group in con-sciousness: the New Group of World Servers. In December 2019, as part of a festival observed every seven years, people from around the world will be invoking energies of light, love and spiritual power from the higher worlds; and evoking response to these energies from the New Group of World Servers.

## EVOKING THE POWER OF THE ONE LIFE

Saturday 28 December 2019 --- 14:00-17:00

Lucis Trust, Rue du Stand 40, 1204 Geneva

---

### Programme

14:00 **Introduction**

**Mantram: "The New Group of World Servers"**

14:10 **The Ten Seed Groups from an astrological perspective**

*Patrice & Frédérique Brasseur*

14:45 **Visualitation: Evoking the Power of the One Life**

14:55 **A review of the Ten Seed Groups**

*Phillip Lindsay*

**With short contributions:**

**The Group of the Political Organisers**

*Judith Hegedus*

**The Group of the Scientific Servers**

*Mintze van der Velde*

**The Group of the Psychologists**

*Vincent Claessens*

16:00 **Plenary Group Discussion**

16:40 **Group Meditation**

17:00 **End of the day**

Entrance in Geneva free

Join through the internet at:

<https://zoom.us/j/661002011>

***This event is financed exclusively by donations.***

***Your contribution is warmly welcomed.***

For more information, please write to:

STRENGTHENING THE HANDS OF THE GROUP OF WORLD SERVERS

I. GROUP FUSION

We recognise our place, as a group, within the heart centre of the group of world servers:

**I am one with my group brothers, and all that I have is theirs.  
May the love which is in my soul pour forth to them.  
May the strength which is in me lift and aid them.  
May the thoughts which my soul creates reach and encourage them.**

II. ALIGNMENT

Mentally extend a line of lighted energy towards the planetary heart centre – the spiritual Hierarchy; to the Christ, the “heart of love” within the spiritual Hierarchy; and towards the planetary head centre – the centre where the will of God is known.

III. HIGHER INTERLUDE

Hold the mind focused for a few moments on the planetary role of the group of world servers mediating between the spiritual Hierarchy and humanity, responding to spiritual impression and meditating the Plan of Light and Love into existence.

IV. MEDITATION Meditate on the seed thought:

***Let reality govern my every thought, and truth be the master of my life.***

V. PRECIPITATION

Visualise the precipitation of the will-to-good, essential love, from the centre where the will of God is known, through the spiritual Hierarchy and the Christ, the group of world servers, all people of good-will everywhere in the world, and finally through the hearts and minds of the whole human family.

VI. LOWER INTERLUDE

**May the Power of the one Life pour through the group of all true servers  
May the Love of the one Soul characterise the lives of all who seek to aid the Great Ones  
May I fulfil my part in the one Work through self-forgetfulness, harmlessness, and right speech.**

Reflect on the seminar theme working out through applied goodwill in all walks of life by all peoples everywhere

## **VII. DISTRIBUTION**

As the Great Invocation is sounded, visualise the irradiation of human consciousness with light and love and power:

**From the point of Light within the Mind of God  
Let light stream forth into the minds of men.  
Let Light descend on Earth.**

**From the point of Love within the Heart of God  
Let love stream forth into the hearts of men.  
May Christ return to Earth.**

**From the centre where the Will of God is known  
Let purpose guide the little wills of men—  
The purpose which the Masters know and serve.**

**From the centre which we call the race of men  
Let the Plan of Love and Light work out.  
And may it seal the door where evil dwells.**

**Let Light and Love and Power restore the Plan on Earth**

**OM**

**OM**

**OM**

---

### **Mantram of the New Group of World Servers**

**May the Power of the one Life  
pour through the group of all true servers.  
May the Love of the one Soul  
characterise the lives of all who seek to aid the Great Ones.**

**May I fulfil my part in the one Work through  
self-forgetfulness, harmlessness, and right speech.**

**OM**

## THE TEN SEED GROUPS

Patrice and Frédérique Brasseur

To understand a kingdom of nature, it is important to know the laws that govern it.

The laws of the human kingdom, the fourth, have as their common denominator, individuation. Progress concerns the individual and the development of individual consciousness.

At the level of the kingdom of the soul, the fifth kingdom, the laws govern group consciousness, since this is the consciousness that prevails in the kingdom of God.

Of the seven laws that represent the psychological structure of the soul, the fifth is called the *Law of Group Progress*. This law stipulates that there is no progress other than in a group.

The word *group* sometimes leads to confusion. It usually defines a gathering of physical persons with or without a common interest. But we use it in a different way when we talk about *group consciousness*.

To speak of the qualities of the soul, it is preferable to speak of an overall consciousness, of a global consciousness, because we are no longer talking about a physically organised group.

In addition to the traditional notion of objective group, it is also about subjective group and subjective group consciousness.

We can even speak of a holarchic consciousness in which each unit knows itself to be the organ of an organism, itself the organ of an even larger organism, and this in an infinite fractal representation that illustrates an overall consciousness both horizontal and vertical. It is with this *group approach that we will continue our discussion*.

The transition from individual work to group work is the key note of the Aquarian Age.

An experiment is therefore being conducted to create energy focal points through ten groups that will allow the sowing of this new state of consciousness. These are subjective groups that bring together people who are aware of the same energies, with the sole purpose of transmitting these to humanity so that they can take form on Earth. The work of cooperation consists in laying the foundations of awareness of a planetary service aimed at the further evolution of all aspects of our society.

There is, of course, no way to register oneself objectively to contribute to the work of these groups...

The inner unity is maintained by a telepathic soul link that is imperceptible to outside observers.

The more we develop the qualities necessary for a given group, the closer we get to it in vibrational terms until we integrate it.

It is essential to know the orientation of each of these groups, because it is through them that the implementation of the planetary Plan is taking place today. The qualitative specificity of each of these groups is reflected in the mental work they do; this will gradually inspire all progress made in the various sectors of society.

Each group deserves that we would devote hours to the development of their respective mission. We will only cover a few of them during this webinar, and we encourage everyone to continue and develop these lines of inquiry tirelessly.

A number of books written by Alice Bailey correspond to the work of these different groups and provide key elements for their orientation. This is what we will highlight. Similarly, the order in which these groups are quoted corresponds to a progression along the zodiacal path; thus each group is in direct connection with an astrological energy and it is interesting to note that the key word of each sign provides an inner indication to the work. When each month we meditate in connection with the energy of the moment, the opportunity to accompany the work of these groups is given to us.

Let us now review all ten seed groups, which are the carriers of evolution.

## 1- The group of telepathic transmitters

Connected to Aries energies.

Evolutionary key word enunciated by the soul: *I come forth and from the plane of mind, I rule.*

Book: Telepathy and the etheric body.

Telepathy already exists at different levels and uses the planetary etheric body as a medium or substance and carrier of information. Thus, there are:

1. A purely etheric, automatic telepathy that is easily perceived in the animal kingdom (schools of fish, bird flights, with simultaneous behaviours).
2. Emotional telepathy is also very common and concerns people who are emotionally connected; this also exists between pets and their masters.

Mental telepathy is still to come and that's where this group comes in.

This telepathy is important to develop, because that is how true communication can take place. Beyond the deformations of the mind, beyond the veil of words and the barrier of languages, it is the true universal language.

The group of telepaths has the function of perceiving the plan and disseminating it.

This is done by **vertical** telepathy, communicating with the Masters and advanced members of Hierarchy who know the plan and seek to enlighten humanity.

At the same time, more horizontal telepathic work is being done to distribute and inform all groups of what has been perceived.

A second function of this group is to **teach** telepathy.

This work is done from soul to soul and from mind to mind. Here we see the link with Aries, whose key word: *I come forth and from the plane of mind, I rule* illustrates this process. The work of perceiving and transmitting of the Plan is an Aries type of work that takes place on the higher mental planes and initiates all creative work.

## 2 - The group of trained observers

Linked to the sign of Taurus.

Key word: *I see and when the Eye is opened, all is light.*

Book: Glamour – a world problem.

Taurus is first and foremost the sign of blindness by the world of forms. In the higher degree, the eye of wisdom opens to discover that all is light and dissipate all the fogs. That's what this second group is working on.

Trained observers seek to uncover glammers and illusions that are distortions of Reality from the point of view of the soul, to redeem the world. They develop a clear vision through current events, by showing "the love that lies under the events of time".

*Glammers* are the beliefs, the ideals that govern our way of being and looking at the world. They determine our behaviours, our emotional reactions and keep us there. Happiness, affection, materialism, money are glammers that make themselves desirable, as they seem so essential.

*An illusion* is a true idea, but partially true, treated on the partisan side of the personality and not from the global side of the soul. Its established status of truth gives it a force that denies any new truth that challenges it. However, "*any true idea is of a temporary nature*".

It is through an enlightened mind that this group dissipates glammers. To dispel the illusion, the work is more complex, because it requires the use of Intuition which is pure knowledge by identification. The entire work of the Tibetan is a powerful contribution to the goal of this group.

### **3 –The group of magnetic healers**

Linked to Gemini energies.

Key word: *I recognise my other self and in the waning of that self, I grow and glow.*

Book: Esoteric healing.

To understand the function of this group, it is necessary to move away from what is usually understood as a magnetic or spiritual healer.

Their work is inspired by the fourth Law of Healing:

Every physical or psychological illness has its roots in the Good, the Beautiful and the True, and cyclically, the soul seeks to advance one of these qualities in each of us. Of course, this creates friction with our own version of Good, Beautiful and True. The gaze of the individual tends to focus on this friction and thus brings the disease, the crisis, the problem...

The work of the healer consists in raising the gaze of the patient towards the proposal of the soul, and accompanying him in this work of evolution.

Gemini, i.e. Castor and Pollux, were healing gods. This energy first symbolises the duality between the soul and the personality. It is the resistance of the latter to the impulses of the soul that brings the disease. When the higher energy of this sign comes into action, a unity is created. Gemini is said to be the resolution of duality in a fluid synthesis. The key word: *I recognise my other self and in the waning of that self, I grow and glow*, masterfully illustrates the process of healing. By the erasure of the resistance of the self, the qualities of the soul circulate and benefit the Earth, so operates the active service, which incidentally heals the one who resisted.

But let us not seek an appointment with such a healer... It is a group work and the real healing will bring together groups of healers who will work with groups of patients in a recognised and accompanied energy attunement.

### **Synthesis of the first three groups**

These first three groups respond to more abstract energies than the following ones. Like the first three rays, the first three signs of the zodiac, or the first three numbers, they represent the archetypes of the fundamental qualities of the soul.

Anyone who rises and stays on the vibrational frequencies of the soul is somewhat telepathic, dissipater of glamour and a healer. That is why everyone, by aligning with the qualities of the soul, can feel in tune with these groups.

However, care must be taken not to confuse telepathy with mediumnity or channeling; dissipating glamour by teaching and healing with so-called spiritual care.

### **4 –The group of educators**

Connected to Cancer energies.

Key word of the soul: *I build a lighted house and therein dwell.*

Books: "Education in the new age" and part of "The Rays and the Initiations".

Educating means: leading out of (ex ducare). The educator is therefore the one who leads someone beyond the limits of his personality, towards his essential being.

The job of the educator is to bring everyone to whom he or she really is. This requires a psychological knowledge, knowledge of the energies of the Rays and of astrology to be able to accompany each child according to his or her astral theme and level of evolution to his or her true emotional, mental, essential nature.

The pinnacle of education is attained when the encounter of soul and personality takes place. This work of education passes through the higher development of the five senses and the construction of the antahkarana which connects initially the 3 aspects of the mind. These are two fundamental keys for all. The construction of this bridge between the subjective world and the objective world will become an essential point that will develop with the practicing of meditation.

The group of educators seeks to establish this vision of education. The art of the antahkarana will be practiced in the manner as presented at length in the book "The Rays and the Initiations".

Cancer is an energy of shaping, of materialising subtle energies. In its lower aspect, only the lunar, material form is expressed; the soul is engulfed in a habitat, a dense and dark house.

The purpose of Cancer is to reveal the founding energies of the form and to ensure that enlightenment dominates. *I build a lighted house and therein dwell*, says the soul. The message is clear. That is the purpose of education.

## **5 -The group of political organisers**

Linked to Leo energies.

Key word of the soul: *I am That and That am I*.

Book : The destiny of the nations.

The purpose of the work of this group is to achieve world unity. Politics is a system of collective initiation, which governs the world and allows everyone to develop the interest of grouping and common functioning. This energy has been at work since the dawn of humanity. Families have grouped into tribes that in turn have gathered to form peoples, provinces and then states. The process continues with the union of states into a higher entity as Europe has attempted for half a century.

All nations will eventually come together, until the various borders and separatisms fall to make way for the United States of the World.

In the past, these groups have often been established under duress, but consciousness of people is changing and gradually encourages people to move towards ever greater alliance and unity.

The second important work of this group concerns the evolution of government systems. The current democracies do not represent an ideal functioning and humanity will experience many more before reaching a government of Wise Men.

The task of this group is to be a liaison between the synthetic affirmation of "That-What-Must-Be", the affirmation of the energy of the first Ray, of Will and the humanity that must implement it.

This process of gradual synthesis is the great quality that animates the sign of Leo. It first leads to a personal synthesis that allows one to affirm one's own will: *I am*. Then to a synthesis of the soul and personality in the service of the Will of the soul proclaiming: *I am That, and That am I*. Finally, the soul melts into the Monad that embodies the Will of the Plan by emitting the *I am who I am*.

## **6 -The group of workers in the field of religion**

Linked to the energies of the Virgo.

Key word of the soul: *I am the mother and the child. I, God, I, matter am*.

Book: The return of Christ.

Religion comes from the Latin "religare", to connect. For a long time religions have invited human beings to connect with energies, gods, forces that surpassed them. Then, in the 19<sup>th</sup> century, a philosophical movement opposed this vision, considering that religion kept people in poverty by making them think of a future paradise and that it was more appropriate to devote oneself to improving the lives of the poorest, by connecting oneself to concrete work.

The religion of form and consumption then gradually imposed itself.

The sixth group must work to unite these two approaches by seeking in the subtle worlds the energies to be embodied in the world of forms. This is how the spiritualisation of matter will take place. This group must invent the new religion that will bring everything below, to vibrate in tune with what is above.

It will have to collaborate with the group of scientists to highlight the energies of the Zodiac and their possible use. Full moon energies can be measured and relayed. The existence of the soul will be manifest and its survival after death will become evident. It will also be possible to record and film the deceased.

This new reality will diminish faith. It will no longer be a question of believing, but of connecting and linking energies to the planet through the events of our daily lives.

The question will no longer be whether or not to believe, but whether or not to participate in the plan by feeling responsible for contributing to it. Religion will become a technical, practical, precise approach.

The basis of this know-how is contained in the Great Invocation; by knowing how to link ourselves to the Light, to Love, to the Will, we can bring them to Earth as well as to the whole of humanity.

The energies of Virgo are energies of unity between the high and the low, between the soul and the form. The key word completely illustrates this process: *I am the mother and the child*, I am the personality and I am the soul, *I, God, I, matter am*, connecting the soul and the form within us and outside us. It is a declaration of fundamental unity.

### **Synthesis of the second ternary**

We have seen that the first three groups correspond to the three fundamental qualities of the soul. The next three are devoted to the education and initiation of humanity.

Education is an individual initiation, politics is an initiation for social groups and religion is an initiation for those who are in evolution.

Education is for everyone as an individual; politics for all as a whole; religion for an enlightened group capable of bringing their Light to all.

## **7 – The group of scientific servers**

Linked to Libra energies.

Key word of the soul: *I choose the way which leads between the two great lines of force.*

Book: There is no specific book about them, but A Treatise on Cosmic Fire can help them in their work.

No writings corresponding clearly to the work of this group, because Alice Bailey having no scientific training, did not know the precise terms allowing her to receive the dictation of the Tibetan.

Committed to the process of uniting spirit and matter, this group must reveal these two vibratory aspects of Life, as one.

Two types of research exist: scientific research that seeks to discover the laws of the universe through matter and esoteric research that pursues the same by exploring the soul and then the spirit. The two must meet and unite to form the group of scientific servers. This group will bring an inner and outer understanding of each law and demonstrate the unity between the inner and outer worlds, between objective and subjective worlds.

It is a group of disciples in training that many researchers are joining today. Its work will allow the Plan to manifest itself even in the physical worlds.

On each of the platters of Libra stand spirit and matter. A deep understanding of each other creates a right relationship between them. This is the middle path that stands between the two main lines of force. It is not a compromise, a median or an average between the two, but a position that allows one foot on each side of Libra, thus connecting the superhuman world to the human world, Spirit to matter.

## 8 –The group of psychologists

Linked to Scorpion energies.

Key word of the soul: *Warrior I am and from the battle I emerge triumphant.*

Books: “Esoteric Psychology” and “A Treatise on Cosmic Fire”.

Psychology means the law of the soul. We would generally consider psychology as an attribute of humanity, but the group of psychologists is entirely dedicated to the study of the soul in all the kingdoms of nature. Its function thus corresponds to the initial meaning of the word psychology. It highlights the role of humanity as an intermediary between the supra-human and sub-human kingdoms. It allows conscious connections to be established between human souls and those present within each form of nature.

They also work on the energetic transmission of ideas from one centre of thought to another. They are the *illuminators of group thinking*.

Their focus on the soul of the subhuman kingdoms helps to understand the importance of their role and the relationship between them and the three bodies of the human personality.

Based on the elements contained in “A Treatise on Cosmic Fire”, they shed light on esotericism from the angle of psychology. They thus gave birth to the new psychology based on the science of the Rays and esoteric astrology.

In the Scorpio energy, the soul asserts its supremacy over the personality by *emerge triumphant from the battle*. Scorpio, the polar opposite of Taurus, is thus an energy of illumination in phase with the third initiation.

The eighth group therefore faces the second group working on the dissipation of glammers. Both by enlightenment contribute to the submission of maya, mirages, illusions and to the triumph of the Dweller of the threshold.

## 9 –The group of economists and financiers

Linked to Sagittarius energies.

Key word of the soul: *I see the goal. I reach that goal and then I see another.*

Book: There is no specific book written for this group, but the key note of Ray 7 which runs through “A Treatise on White Magic” corresponds to it.

Astrologically, Sagittarius and Gemini face each other and are both linked to healing. The ninth group is therefore the complementary opposite of the third.

Both work on the etheric body on different scales, because money is the condensation of the etheric body of humanity.

If we consider the distribution of money and its circulation in the world, we can only see the imbalances that produce this sick world.

This group should shed light on the relationship between money and consciousness.

Energy, money, time are interchangeable terms, and the way we manage them reflects our states of consciousness. These relationships are one of the expressions of Ray 3, connected to Sagittarius by the energy of the Earth.

It must also instill the idea of sharing. In a healthy etheric body, energy circulates freely in all spaces according to needs without retention in a harmonious distribution. This operation illustrates the law of supply and demand, linked to the sharing that humanity must implement to move towards balanced relationships in all sectors of society.

Finally, it works on the fair distribution of money and its wise use. To which area should it be devoted as a priority for the common good? In *The Externalisation of the Hierarchy* Alice Bailey points out the importance of allocating significant resources to education; this is still true today!

The purpose of this group is to divert a large part of the money flow currently devoted to the construction of forms, aimed at the material well-being of humanity, to be used for the goal of inner growth, the only growth of the future for humanity.

### **The last ternary in relation to the three sciences**

Fundamental science with scientists. Relationship Spirit matter The science of the soul with psychologists. Relationship soul form Energy science with economists and financiers. Relationship Soul energy.

### **10 – The group of creative workers**

Linked to Capricorn energies.

Key word: *Lost am I in light supernal, yet on that light I turn my back.*

Book: none.

This group includes members of the other nine groups.

It is a synthesis group, responsible for connecting the other nine so that they work in a creative way on the physical plane.

It works closely with the financiers and helps each group to make their action a reality.

The key word of Capricorn is control. The true master is the one who is at the service of all, which the tenth group does.

Some wonder about the absence of Aquarius and Pisces. It is possible to add them to this wheel of the seed groups, but it is necessary to exceed the level of the disciples...

Once the state of mastery has been reached, the Masters work as World Servers in Aquarius and as World Saviours in Pisces.

All these groups are working towards the same goal, to reveal the One Life.

\* \* \*

# EVOKING THE POWER OF THE ONE LIFE

## *Visualisation to Empower the Work of the New Group of World Servers*

*'The Law of Group Progress' refers to a type of energy which is producing the coherence of units in a group, thus forming them into one living organism. Sometimes called 'the Law of Elevation' it concerns the mysteries of group realisation, and expansions of consciousness and the part each unit plays in the general progress of a group. Certain great triangles of energy will be found in the individual and consequently increasingly in humanity. Then the "forces of creative life" will circulate from the "point within the head" (the head centre) along the 'line to the heart' and then, with the throat centre, form a 'triangle of fiery light'... When this is being consummated, then the Law of Group Progress begins definitely to function and to control.'*

### 1. ALIGNMENT AND CIRCULATION OF ENERGY

(a) Visualise the aligned personality in communication with the Higher Self.

(b) Sense the "forces of creative life" pouring down from the Higher Self and circulating around the etheric head, heart and throat centres to form a "triangle of fiery light."

(c) Affirmation:

*Let the energy circulate and 'the Law of Group Progress' control.*

**OM**

## II. GROUP INTEGRATION

Visualise the Law of Group Progress energizing and cohering all true servers into "one living organism."

Sound the mantram:

**I am one with my group brothers and all that I have is theirs.  
May the love which is in my soul pour forth to them.  
May the strength which is in me lift and aid them.  
May the thoughts which my soul creates reach and encourage them.**

## III. ELEVATION

The effect of the Law of Group Progress is ELEVATION. Imagine the group consciousness responding to this effect and rising as one to the mountaintop of Capricorn.

***Stand as a group on the mountaintop.***

**OM**

#### IV. REFLECTIVE CONTEMPLATION

*“‘The Law of Group Progress’ ...sometimes called ‘the Law of Elevation’ concerns the mysteries of group realisation, and expansions of consciousness and the part each unit plays in the general progress of a group.*

#### V. PLANETARY ALIGNMENT AND CIRCULATION OF ENERGY

Visualise the lighted energies of Capricorn, augmented by a still greater constellation beyond, streaming into Shamballa and circulating around the planetary “triangle of fiery light.”

*Planetary head centre:*        **Shamballa**

*Planetary heart centre:*     **Hierarchy**

*Planetary throat centre:*   **Humanity** —        Represented by The New Group  
of World Servers standing on the  
mountaintop.

#### VI. GROUP EVOCATION

**May the Power of the one Life  
pour through the group of all true servers.  
May the Love of the One Soul  
characterize the lives of all who seek to aid the Great Ones.  
May I fulfil my part in the One work  
through self-forgetfulness, harmlessness and right speech.**

**OM**

*Endeavour to hold on to the altitude of group consciousness achieved throughout the day. This is pictorially depicted in the symbol overleaf, a full explanation of which is given in the accompanying “Notes on the Festival Week Visualisation.”*

\* \* \*

# THE NEW GROUP OF WORLD SERVERS, 2025

## THE EXTERNALISATION OF THE HIERARCHY

### THE TEN SEED GROUPS

Phillip Lindsay – Esoteric Astrologer

(This talk is based upon extracts from the web-site of Phillip:

<https://esotericastrologer.org/newsletters/special-edition-newsletter-capricorn-servers-week-2025-the-externalisation-of-the-hierarchy/>.)

## THE FIVE PLANETARY CITY CENTRES

The five *planetary city centres* are of utmost importance for understanding the direction of energies and forces as they circulate around the planet; particularly at the full moon periods, where meditators are enjoined to visualise energies pouring through those centres. Each city is responsible for the distribution of energy to various parts of the world, depicted by the diagram below:

The Transmission of Rays and Zodiac Forces to Planet Earth – via the Five Planetary Centres and Five Continents.

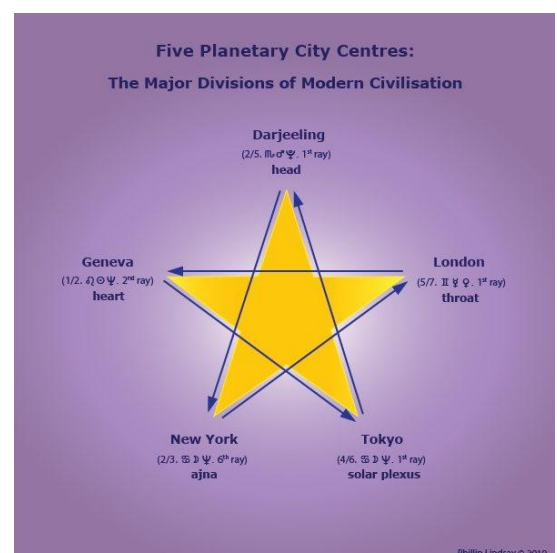

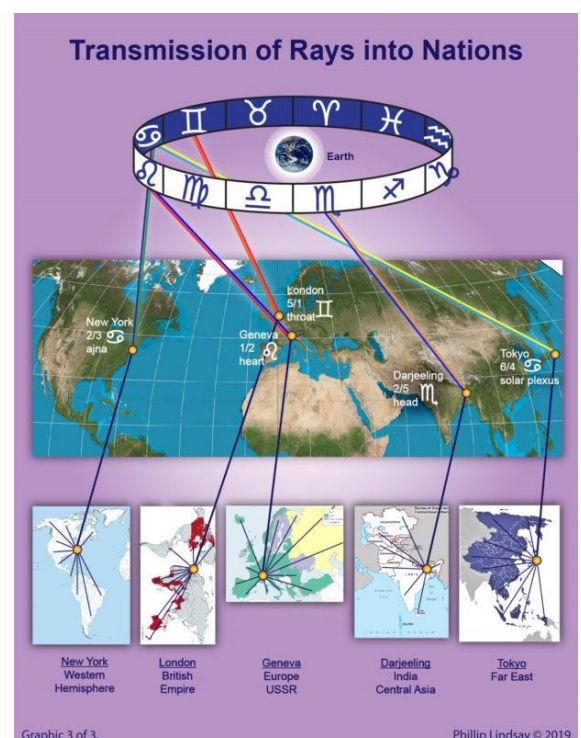

The chakras assigned to these centres are the [author's evolving understanding](#). Out of these five centres, the reader will note the seeming contradiction of the small town of Darjeeling, compared to the other very large cities. This is because Darjeeling is a highly magnetised and ancient centre associated with India's vast history; it is also in physical proximity to the Himalayas, the abode of the Masters of Wisdom.

"... the physical plane areas or localities which constitute the present modern exits for energies, through which directed energies can pass to carry out the creative process, are five in number: New York, London, Geneva, Darjeeling and Tokyo. These five form a *five-pointed star of interlocking energies*, symbolic of the major divisions of our modern civilisation.

### The Five Planetary City Centres: The Major Divisions of Our Modern Civilisation.

... I am here concerned with physical plane utilisation of energy through the power of directed thinking and on behalf of the evolution and well-being of mankind. At each one of these five centres one of the Masters will be found present, with His Ashram, and a vortex of spiritual forces will there be organised to hasten and materialise the plans of the Christ for the new and coming world cycle.

The organising of these five centres will be done slowly and gradually. A senior disciple will appear and will work quietly at the foundation work, gathering around him the needed agents, aspirants and assistants. All these workers at any particular centre will be trained to think, and the effort now present in the educational and social world to force men to think for themselves is a general part of this training process." [18](#)

## HOW CAN KNOWLEDGE OF THE FIVE CITIES BE OF PRACTICAL USE?

1. To visualise energies pouring through these cities at full moon group or individual meditations – to realise the power of subjectively directed thought.
2. To understand that these five centres have jurisdiction over large sections of the planet. Hence energy pouring through or directed through them, has potential for wide distribution.
3. That these centres are ruled by astrological and ray forces – that may be particularly strong at various full moon festivals. For instance, during the month of Scorpio, and at the full moon – Darjeeling. Or Leo in Geneva's case etc. (The Orient and Occident also have soul and personality rays: Orient 4/3 and Occident 2/4.)
4. That the nations which fall within these five regions, all have their own astrological and ray rulerships – which or may not correspond to the astro-ray rulership of the city in question. For instance, Geneva is ruled by Leo and its nation Switzerland is an Aries soul and Aquarius personality.

5. That various individuals may find themselves living in physical proximity to these major centres, or a national centre/city associated with a global centre. There may be an attraction to these cities, based upon individual karma, astro-ray influences – or group affiliations.

However, as far as the efficacy of meditating groups is concerned, *consciousness* does not recognise the tyranny of distance. Groups and individuals can link up with one another instantaneously and direct energies accordingly. Each group or individual bring their own nation's astro-rayological qualities to building the emerging paradigm – the transformation of the etheric body of our planet from material squares to spiritual triangles – as outlined in the next section.

Of course, information about the centres is useless unless one has a rudimentary understanding of how they function. For instance, the solar plexus (Tokyo) is the seat of the emotional body. The throat centre (London) is the gate of the mental body etc. Matching the function of a planetary chakra/city with the astro-ray make up and its function in the outer world, will go a long way to develop an understanding of how energy circulates around the planet – within the Grand Design!

The science of the planetary centres is in its infancy – the assignment of chakras to the five main cities was never given out by the Master DK. There is a fair degree of certainty of chakra assignment to some centres, others are a matter of debate among esoteric enquirers.

Some students will be able to make use of this information, and test its veracity. To be aware of all these energy relationships is to consolidate a world view that is protective of *The Planetary Plan's* unfoldment and development. The visualisation of the planetary centres in global-linking group meditation, shields the ongoing

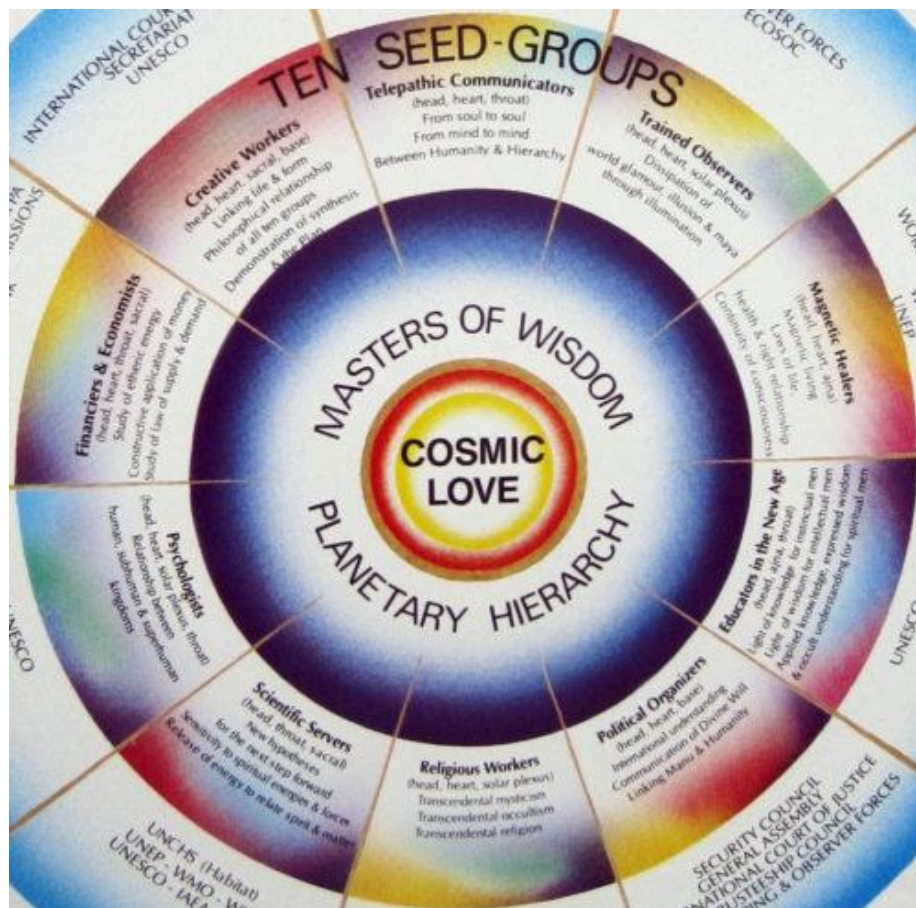

relentless attacks from the Forces of Materialism, the Black Lodge:

“... the Members of the Hierarchy are not only sensitive to impression from the two other planetary centres (Shamballa and Humanity), but They are acutely aware of the Forces of Evil which are *fighting furiously* against the externalisation of the spiritual work.”<sup>19</sup>

## THE NGWS AND THE TEN SEED GROUPS

The NGWS is comprised of ten seed groups, as in the diagram below, also listed in greater detail in the table at [Appendix 1](#). Bear in mind that the majority of the NGWS are not esoterically inclined or necessarily “spiritual” in an obvious way. Nevertheless, they range from “men and women of goodwill” to aspirants, disciples and initiates; they have a potent sense of mission and the part that they must play in the reformation of the world. The responsibility of the small proportion of the esoteric members of the NGWS, is to work subjectively, supporting the entire NGWS group. The ten seed groups are worth studying to find the one with which there is the most resonance; in any subsequent realisation lies the path for a more enhanced and empowered service expression; there can be identification with more than one group.

## THE TEN SEED GROUPS

## THE EXTERNALISATION OF THE HIERARCHY AFTER 2025

This current period of 2019 leading to 2025, closes a window that opened in 1965, mirroring an earlier opportunity 2,500 years ago:

“In the time of the Buddha and through the stimulation He produced there was a great gathering in of Arhats. These were men who had achieved liberation through self-initiated effort. This period, in our Aryan race, marked a climax for the East. Since then the tide of spiritual life has steadily flowed westward, and we may now look for a corresponding climax in the West, which will reach its zenith between the years 1965 and 2025. Towards this end the adepts of the East and of the West are unitedly working, for they follow always the Law.”<sup>25</sup>

As earlier stated, contact by the Masters directly with Humanity, has not occurred since ancient Atlantis. Hence, Their renewed presence at the beginning of the Age of Aquarius promises accelerated revolution in human consciousness; a truly “golden age”, another name for the Satya Yuga that is now beginning for the next Sixth Rootrace.

The New Era will usher in new forms of music and art that will emerge under the influence of the fourth ray cycle – which coincidentally begins in 2025. The fourth ray of Harmony Through Conflict, the ray of beauty, art and music. These new art forms will reflect the fresh frequencies precipitating into human consciousness, the energies of Aquarius; they will, complement the fifth ray of science forces that will also be powerful throughout the age, an age that Humanity must build of its own free will and conscious co-operation with the known Planetary Plan: “Music will be largely employed in construction, and in one hundred years from now it will be a feature in certain work of a constructive nature.”<sup>26</sup>

*Shakyamuni Buddha with 18 Arhats. (Mukti Singh Thapa.)*

As to the exact date of the Externalisation after 2025, the following passage written in 1943, may offer a hint:

Sanat Kumara at Shamballa. (Command of Rigden Djapo by Nicholas Roerich.)

“The Restoration of the Mysteries, the initiation of those disciples who have stood firm and unafraid during the war [WWII], the enlargement of Their ashrams, owing to the almost unforeseen development of the spiritual sense among the world aspirants who would not normally have become disciples during this incarnation, and also the *externalisation of Their ashrams during the next one hundred years, preparatory to the reappearance of the Hierarchy upon earth*, are some of His present hierarchical responsibilities.

These involve a tremendous expenditure of force, of second ray energy, just as His [The Christ] first activity demands an unusual expenditure of first ray power—something which even He, in His high place, is only now learning to handle, as a pledged Disciple of Sanat Kumara.”<sup>27</sup>

The use of the phrase “next one hundred years” may be generic and not necessarily literal; but it must point to a time-frame in which the Hierarchy are aiming to implement the Plan. If 100 is added to 1943 = 2043. And that might be construed as the *latest* date for the externalisation of the ashrams of disciples and initiates per se – “preparatory to the reappearance of the Hierarchy upon earth”. Only a mere two decades after 2025!

Nevertheless, nothing is hewn in stone for Hierarchical plans, always subject to change, depending upon human responses, decisions and action taken. For example in the above passage, “unforeseen development of the spiritual sense among the world aspirants who would not normally have become disciples during this incarnation”.

## APPENDIX 1: THE TEN SEED GROUPS

### Group 1

**Seed Group:** *Telepathic Communicators* - Head, heart and throat centres

**Book:** Telepathy and the Etheric Vehicle

(DINAI 35) These people are receptive to impression from the Masters and from each other; they are the custodians of group purpose and, therefore, closely related to all the other types of groups. Their work is largely on the mental plane and they work in and with thought matter and with the reception and direction of thought currents. They are also working at the facilitation of communication between individuals so that the rules and methods whereby speech can be transcended may become known and the new way of intercourse be brought about. Communication will eventually be:

- a. *Soul to soul* on the higher levels of the mental plane. This involves complete alignment, so that soul-mind-brain are completely at-one.
- b. *Mind to mind* on the lower levels of the mental plane. This involves the complete integration of the personality or lower self, so that mind and brain are at-one.

Disciples must remember these two distinctive contacts and bear in mind also that the greater contact need not necessarily include the lesser. Telepathic communication between the different aspects of the human being is entirely possible at varying stages of unfoldment.

[More detail about the Telepathic Communicators.](#)

### Group 2

**Seed Group:** *Trained Observers* - Head, heart and solar plexus centres

**Book:** Glamour a World Problem

(DINAI 36) Their objective is *to see clearly through all events, through space and time by means of the cultivation and use of the intuition. They work very largely on the astral plane at the dissipation of glamour*, thus bringing in illumination to mankind. Thus another type of energy is brought into play, producing another type of inter-relation and communication. This communication is between the plane which is the plane of illumination and pure reason (the buddhic plane) and the plane of illusion and glamour, which is the astral plane.

The Trained Observers are asked to remember that their great task is *to dispel the world illusion through the pouring in of light*. When there are a sufficient number of groups, working along these lines, there will be found—upon the physical plane—certain channels of communication which will act as the mediators between the world of light and the world of illusion. They will be transmitters of that form of energy which will break up the existing glours and illusions, and so dissipate the ancient deceptive thoughtforms. They will release the light and peace which will illumine the astral plane and dispel the illusory nature of its life.

[More detail about the Trained Observers.](#)

### Group 3

**Seed Group:** *Magnetic Healers* - Healers are found on all seven Soul Rays. Head, heart and ajna centres

**Book:** Esoteric Healing

(DINAI 37) These healers have no relation to the work of the so-called magnetic healers of today. They *work intelligently with the vital forces of the etheric body*. Much of their work is dealt with in *Esoteric Healing*. This group of healers must bring about the *right healing of the personalities of individuals in all aspects* of their nature. The work to be done is that of the intelligent transmission of energy to various parts of the nature—mental, emotional and physical—through the right organisation and circulation of force. Present day healers should endeavour to *break loose from the modern*

and traditional ideas as to healing; they should recognise the stupendous fact that *healing must eventually be carried forward by groups which will act as the intermediaries* between the plane of spiritual energy (either soul energy, intuitional energy or will energy) and the patient or group of patients. Note this last point. The *group idea* must always be remembered by the students as they work; they must *not* work as individuals but as units in a coherent whole. This will distinguish the New Age methods from the past, for the work will be group work and, usually, for a group. Magnetic healers must learn to work as souls and not as individuals. They must learn to communicate healing energy from the reservoir of living force to the patient or patients.

[More detail about the Magnetic Healers.](#)

#### **Group 4**

**Seed Group:** *Educators of the New Age* - 2<sup>nd</sup> Ray Souls and those with strong emphasis on the 2<sup>nd</sup> Ray (suggested) - Head, heart and throat centres

**Book:**

(DINAI 37) Their *service is along the line of culture* and they will work to bring in *the new type of education*. Their emphasis will be upon the building of the antahkarana and upon the *use of the mind in meditation*. Again—much of this new educational science will be given in the fifth volume of the series. They will act as communicators and transmitters of two aspects of divine energy—knowledge and wisdom. These must be thought of in terms of energy.

This fourth group (whose work is concerned with the *education of the masses*) is a *direct intermediary between the higher mind and the lower mind*. They are concerned with the building of the antahkarana and their task is that of linking the three points of mental focus—the higher mind, the soul and the lower mind—so that there may be established *a group antahkarana* between the kingdom of souls and the world of men.

[More detail about the Educators of the New Age.](#)

#### **Group 5**

**Seed Group:** *Political Organisers* - 1<sup>st</sup> Ray Souls and those with strong emphasis on the 1<sup>st</sup> Ray (suggested) - Head, heart, base centres

**Book:**

(DINAI 38) Concerns itself with political factors in every nation. They will work in the world of human government, *dealing with the problems of civilisation* and with the relationships existing between nations. The *bringing about of international understanding* will be their major objective. This group communicates the “quality of imposition,” and an authority that is lacking in the other branches of this divine group activity. This work is *largely first ray work*. It will embody the method whereby *the divine Will works out in the consciousness of races and nations*. Members of this group will have *much first ray energy in their equipment*. Their work is to act as channels of communication between the department of the Manu and the race of men. It is a noble task, my brothers, to be channels for the will of God.

[More detail about the Political Organisers](#)

#### **Group 6**

**Seed Group:** *Workers in the Field of Religion* - Head, heart and solar plexus centres. Necessarily the same as Group 2

**Book:** Reappearance of the Christ

(DINAI 38) Their work is to *formulate the universal platform of the new world religion*. It is a work of loving synthesis and it will emphasize the unity and the fellowship of the spirit. This group is, in a pronounced sense, *a channel for the activity of the second Ray of Love-Wisdom, that of the World Teacher*—an office held at present by the Christ. The platform of the new world religion will be built by the many groups, working under the inspiration of the Christ and the influence of the second ray and these—in their totality—will constitute this sixth group.

2<sup>nd</sup> Ray Souls and those with strong emphasis on the 2<sup>nd</sup> Ray (suggested)

[More detail about the Workers in the Field of Religion](#)

#### **Group 7**

**Seed Group:** *Scientific Servers* - The head, throat and sacral centres

**Book:**

(DINAI 39) They will *reveal the essential spirituality of all scientific work* which is motivated by love of humanity and its welfare, which relates science and religion and brings to light the glory of God through the medium of His tangible world and His works. They have a most interesting function but one which will not become evident for a long time—not until the building forces of the universe are better understood. This will be co-incident with the development of etheric vision.

This group will act as a channel of communication or intermediary between the energies which constitute the forces which construct the forms and fabricate the outer garment of Deity and the human spirits. You will note here, consequently, the possibility that this group's main initial work will be concerned with the problem of reincarnation. That problem deals with the taking of an outer garment or form under the Law of Rebirth.

[More detail about the Scientific Servers](#)

## Group 8

**Seed Group:** *Psychologists* - Head, heart, solar plexus and throat centres. 1st group to use 4 centres – mediators of thought between other groups – a linking group.

**Book:** Esoteric Psychology I, II. Esoteric Astrology

(DINAI 39) They will be concerned with *the revelation of the fact of the soul and with the new psychology* which will be based upon *the seven ray types and the new esoteric astrology*. Their major task will be to relate, through approved techniques, the soul and the personality, leading to the revelation of divinity through the medium of humanity.

*They will act also as transmitters of illumination between groups of thinkers and as illuminators of group thought.* They transmit energy from one thought centre to another and, above everything else, *they transmit the energy of ideas*. The world of ideas is a world of dynamic force centres. Let this not be forgotten. These ideas have to be contacted and noted and their energy has to be assimilated and transmitted.

[More detail about the Psychologists](#)

## Group 9

**Seed Group:** *Financiers and Economists* - Head, heart, throat and sacral centres.

**Book:**

(DINAI 39) They will work with the energies and forces which express themselves *through the interchange and the values of commerce*; they will deal with *the Law of Supply and Demand and with the great principle of Sharing* which ever governs divine purpose. They will be *the great psychometrical workers*, for a psychometrist is one whose soul is sensitive to the soul in others and in all forms of life. The principle of Sharing which must govern economic relations in the future is a soul quality or energy and hence their work of relating soul with soul. They also evoke the soul of the past, linking it with the present and finding it likewise indicative of the future.

[More detail about the Financiers and Economists](#)

## Group 10

**Seed Group:** *Creative Workers* - Head, heart, sacral, base centres.

**Book:**

(DINAI 40) They are *communicators between the third aspect of Divinity, the Creative Aspect*—as it expresses itself through the creative work and in response to the thought world—and *the first aspect, Life*. They link and blend life and form creatively. They are closely related to the ninth group because today, unknowingly and without any true understanding, they are *bringing about a concretisation of the energy of desire*; this in its turn brings about the creation of things.

Incidentally, therefore, *they are concerned with the concretisation of money*. Their work is also largely philosophical and concerned with the task of relating—factually and scientifically—the other nine

types of groups so that they may work creatively upon the physical plane and the divine Plan may clearly appear as a result of this synthesis which they bring about.

[More detail about the Creative Workers](#)

\* \* \*

## THE GROUP OF POLITICAL ORGANISERS

*Judith Hegedus*

The past few years have brought a number of highly visible issues and changes to the surface in the political life of nations. Everywhere we look, we see chaos and division – but not only. What the world previously knew as stability has become elusive. As we know external reality is a reflection of our inner reality, so this external political chaos is a great starting point for inner reflection. The key point here is to accept it as a starting point – even if we wish the picture looked different. Political organizers have to transform this situation to ensure governmental models can evolve, true democracy can be established and we will eventually reach the goal of world unity down the line.

After decades of extensive globalization, nations closely trading together and forming supranational political group entities like the EU, the process seems to have stalled. There is a tendency nowadays for many nations to turn rather inward-looking and focusing on themselves. But is it necessarily a bad thing? This could be a productive period of self-reflection and resetting priorities for each nation, aligning them closer with their soul expressions. This requires members of the New Group of World Servers within each nation to work subjectively towards this purpose. Increasing the level of consciousness within their nations is a prerequisite for true democracy. We cannot create higher-level political group entities under duress, by force – this is the lesson we can take from the collapse of the former state socialist/communist countries in Eastern Europe and the Soviet Union. We need to increase consciousness levels so these entities are formed by people's free will. Only this ensures sustainability long-term. For true democracy to ever become established, we need right education for everyone, training them to recognize higher idealism and learn to work together in the spirit of cooperation, leading to synthesis. Government systems will only evolve once these pieces are put together.

So much in politics nowadays happens around identity. Much research and analysis has been done on the results of the US election in 2016 as well as the 2016 Brexit referendum, and most recently on the British elections that took place on December 12. Voting patterns have been changing: there seems to be a strong shift towards emphasizing national identity as opposed to class identity. The forces of materialism are in battle with spiritual ideals, and they seek to attack where there are weaknesses: the way capitalism is practiced nowadays created a model with high levels of capital concentration and a focus on financial manipulation, reducing opportunity for the average person. Many people feel left out and on a downhill trajectory, economically speaking. Inequality has reached grotesque proportions. This gives rise to all kinds of fears and they make people susceptible to simplistic and often untrue populist messages from political leaders. Let's seal the door where evil dwells!

We have come full circle: only increased levels of consciousness and the recognition of the One Humanity can counter these messages long-term. The time has come for political organizers from the New Group of World Servers to link together and strengthen their subjective unity. The current disarray on the political scene is the reflection of the inner changes taking place, and we know implementing change is always hard. Members of this seed group act like “guides”, or change managers, working to increase consciousness on the national level and keeping the integrity of higher-level political formations intact. These formations provide opportunities for nations to cooperate more closely and it is very important to keep these channels of cooperation open nowadays, so we can draw on them later.

I would like to also approach the work of the political organizers from an objective, pragmatic perspective. The ever-present separative political messages need to be countered by messages of unity and integrity. Political organizers need to be very well organized to do this, utilizing not just goodwill but also strong skill sets for communication, project management, financial management and fund raising. The work needs to be extremely focused and relentless, and goodwill alone is not enough. They will have to be flexible,

look for opportunities and form alliances. They will then have to heal cleavages, transform outdated, separative patterns of political thinking and habits, shifting them to a higher level, allowing for unity and integration. The best approach is to be invested in the process not the outcome!

This autumn we commemorated the peaceful fall of the Eastern European communist/state socialist regimes exactly 30 years ago, in the final months of 1989. A most recent anniversary was the popular uprising against the dictatorial regime in Romania, which started with a seemingly insignificant event on December 15, 1989 in Timisoara, in Transylvania, the western part of Romania. A member of the local Hungarian minority, a Reformed minister named László Tőkés was evicted from his home and church for opposing the dictatorial government. Members of his church, all ethnic Hungarians, formed a human chain around his house that evening as police and state security officers were on the other side of the street ready to attack them. Soon the Hungarians were joined by members of a local Romanian Baptist church, and they faced the police together. Romania at the time had a particularly brutal regime that regularly intimidated its citizens – and sometimes physically annihilated those with different opinions. The police told the Romanians to go home, and said they would deal with the Hungarians later. Petru Dugulescu, the Romanian Baptist pastor answered: "We are not Hungarians and Romanians but all brothers and sisters in Christ". It took only 10 days for the regime to fall. Now, 30 years later, with ethnic strife and nationalism increasing worldwide, including in Eastern Europe, we need to remember uplifting examples like this to remember what is possible.

It was a milestone recently to see the spiritual author Marianne Williamson as a candidate in the Democratic presidential primaries on the debate stage. Her message of love and her plan to transform the politics of fear and divisiveness in the United States reached a very large audience and resonated with millions of people. Even if she didn't get to be the Democratic nominee, this is an important step in the process of getting the United States closer to expressing their soul qualities. Her rise to become a candidate should serve as inspiration to potential political candidates all over the world who have the same mission: to strengthen the "soul" of their nation. It is these candidates political organizers should support. Also some more good news recently: the EU held elections for the European Parliament in all of its member states in May this year, and participation was a record high everywhere. Consciousness has changed: Europeans actually feel like these supra-national representatives make a difference, and they wanted to have their voices heard by voting. Considering that the EU has been around only for a few decades, and its newest member state joined only 6 years ago, this is a significant achievement. There is much work left but the Plan is always working.

\* \* \*

## THE SEED GROUP OF SCIENTIFIC SERVERS

Mintze van der Velde, World Goodwill Geneva

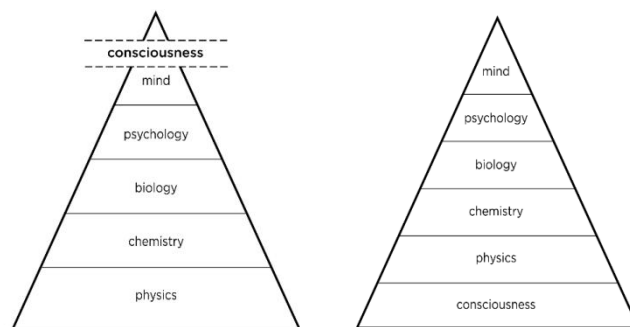

The *Group of Scientific Servers* is the seventh seed group. It might be good to remember that the scope of the work of these groups is measured in centuries rather than decades. Hence it is not straightforward to identify specific progress of any of these groups. It may be of interest to remind us of what the Tibetan wrote anent this group<sup>1</sup>: *"I doubt that it will be possible to do much in connection with the forming of this group, and this for several reasons. The first is that such a group cannot be formed until a certain scientific discovery has been made of such moment that our present scientific inhibition in recognising the fact of the soul as a creative factor will disappear. This discovery will be part of the acknowledged "facts of science" by the year 1975. Secondly, A.A.B. has not the necessary scientific knowledge to do more than grasp the broader outlines of the intended work, and then only primarily from the angle of the more mystical and philosophical approaches."*

It would be too optimistic and not justified to claim that already from 1975 on "the fact of the soul as a creative factor" is common good in scientific thinking. Nevertheless, let us try to see whether we can see some pattern with respect to this group of scientific servers.

---

<sup>1</sup> Alice A. Bailey, *The Externalisation of the Hierarchy*, p 57-58.

One is the origin of *consciousness*. In the last century the dominant view of the different sciences was a pyramid with physics at its basis, followed by chemistry, biology, psychology. From there theories on the mind were developed where we would also locate consciousness. In other words: consciousness would be seen as the result of chemical and electrical interactions in the brain. Yet since a few decades, let's say starting in the nineteen seventies, a growing body of scientific publications acknowledges that there is a big problem with that mainstream point of view and a newer approach is suggested where consciousness is at the bottom, i.e. the origin, of all the other sciences. A good review of this approach can be found in Dean Radin's book<sup>2</sup>: *"Real Magic: Ancient Wisdom, Modern Science"*.

So science itself is in process of transformation. The discovery of quantum physics and relativity theory at the beginning of the 20<sup>th</sup> century were major advancements of science. Yet, since then no major breakthroughs have been seen – only technology based on that part of science has made life a lot more comfortable. Yet, we have been told that the truth of certain basic premises of the Ageless Wisdom will be demonstrated, such as:

1. The soul is the form-building principle, producing attraction and cohesion.
2. This soul is an aspect or type of energy, distinguished from that of matter itself.
3. The atom has been recognised as an energy unit, but as yet the energy which sweeps atoms into aggregates which we call organisms and forms has not been isolated. It is the quality of the energy which produces the quantity of forms; it is the light which causes the emergence into consciousness of the race of heterogeneous shapes which aggregates of atoms can assume.
4. This type of energy which produces the shapes and forms and coherent organisms in all the kingdoms of nature is not the life principle. The life principle will remain undiscovered and unrecognised until such time as the soul is studied, recognised and in its turn investigated.
5. This is only possible as man steps forth into a fuller conscious possession of his divine heritage, and working as a soul and in control of his mechanism (physical, emotional, and mental) can work consciously en rapport with the soul in all forms.

The discovery of the releasing of the energy of the atom was a major discovery, but it did not (yet) lead to "energy for all". That would completely change the economic and political situation in the world, for the latter is largely dependent upon the former. Our mechanical civilisation will be simplified, and an era ushered in which will be free from the incubus of money, and the human family will recognise universally its status as a bridging kingdom between the three lower kingdoms of nature and the fifth or spiritual kingdom.

What is the situation now with so-called "free energy", "zero-point energy" etc.? In the Secret Doctrine H.P. Blavatsky has a whole section (The Coming Force)<sup>3</sup> on J.W. Keely (1837-1898). Keely was one of the first inventors to have some kind of a motor which would run indefinitely long. Standard science forbids such devices on the premise of the "law of conservation of energy". But that law stems from the study of thermodynamics and above all for closed systems.

<sup>2</sup> Dean Radin, *Real Magic: Ancient Wisdom, Modern Science, and a Guide to the Secret Power of the Universe*, Harmony, 2018.

<sup>3</sup> H.P. Blavatsky, *The Secret Doctrine*, Vol. I, pp. 554-66, in Section X entitled "The Coming Force"

Nikola Tesla (1856-1943) famously stated: *"If you want to find the secrets of the universe, think in terms of energy, frequency and vibration."* Tesla was another figure who built devices of extraordinary capabilities. Little acknowledged, Tesla was the one who is at the origin of much of our alternating current system we now use all over the world. After his death many of the notes of Tesla were confiscated by the C.I.A. Tesla thought that huge amounts of energy could be drawn out of the vibrations in the air around us. He wanted to develop energy systems to the benefit of all of humanity. Why did these two forerunners not succeed? I think the time was not ripe – i.e. human consciousness was not ready for such technology.

Are we ready now? Perhaps: In the book *"Hidden Energy"*<sup>4</sup> Jeane Manning and Susan Manewich describe the landscape of today. Out of dozens of claims of free energy devices tests with most sophisticated measuring equipment show that a handful of devices do produce more energy output than has initially been put into. The problem is to match, or link, the *inventors* to potential *investors* – which would eventually result in real products. This was the same problem for Keely and Tesla too. The inventors mostly are people who want their invention to benefit to the whole of humanity. Investors are still largely interested in huge profits. There is now, however, a foundation called *NUI Foundation*<sup>5</sup> whose mission it is to provide an *Ethical Business Blueprint* for the professional vetting, incubation, design, manufacturing and distribution of New Energy Technologies to communities across the world for the benefit of Planet Earth and Humankind. The fact that there are several real world devices of free energy plus the help of this kind of foundations is hopeful and promising.

Paul Babcock, one of those forerunners, summarises the issue quite clearly: *"I love free energy; it's very necessary for us, but if we don't grow as human beings, if we don't find who we really are, if we don't master ourselves better, what's the point? One day it dawned upon me... 'If I give the world this stuff and all it does is make cheaper electricity so people can watch more TV, what have I really done?'"*<sup>6</sup>

I cannot conclude my talk without mentioning the SAFIRE<sup>7</sup> project. The SAFIRE Project has successfully reverse engineered the atmosphere of the sun in a laboratory on Earth. It presents evidence of energy production, transmutation of elements, and remediation of radioactive materials.

\* \* \*

## NEW AGE SEED GROUPS THE GROUP OF PSYCHOLOGISTS

Vincent Claessens – World Goodwill Geneva

Before looking at what the task of the 8<sup>th</sup> seed group – the group of psychologists – consists of, let us take a look at the current situation in the field of psychology. The science of psychology is quite recent and a brief history of its various currents will help us to see where we are today and what the prospects are for the future.

The first current that emerged in the 19<sup>th</sup> century was called **"psycho-physiology"**. It focused on the relationships between the functions of the organism and psychological activity including emotions, thoughts... This type of research is now part of the "cognitive sciences" that offer an analysis of the mechanisms of memory, perception, learning... Soon thereafter, **Behaviorism** appeared which focused on studying the influence of external stimuli on behaviour. The purpose was to predict and control behaviour. But this vision of the human being as being mainly conditioned by external factors

---

<sup>4</sup> Jeane Manning & Susan Manewich, *Hidden Energy*, FriesenPress, 2019.

<sup>5</sup> See : <https://www.thenuifoundation.com/> and also: <https://newenergymovement.org/> for more information.

<sup>6</sup> Jeane Manning & Susan Manewich, *Hidden Energy*, FriesenPress, 2019 – page 189.

<sup>7</sup> See: <https://www.safireproject.com/>

gave rise to certain criticism. This suggested that humans react like a machine that acts objectively, like a computer program, according to the information previously supplied.

The second current, **Psychoanalysis**, filled this gap by highlighting the existence of the unconscious. The subjectivity of the individual was first brought to light by Freudian theory, which described the complex mechanisms of the unconscious by analysing the deep impulses and anxieties that act behind the scenes, behind the apparent behaviour of the individual. The psychoanalytical approach is exploring behind the human being's surface to pierce his intimacy, hence its name of "Depth-Psychology".

Once again, other psychologists refused the idea of an individual being directed unknowingly by his unconscious impulses and forced to submit to the constraints of a repressive Superego. These researchers have investigated the values that give meaning to life. The 3rd current named **Humanist Psychology** appeared in the 1950s. It conceives of the human being as at the centre, able to direct his life creatively according to certain values. The Logo therapy developed by Dr. Frankl, Carl Roger's Non-Directive Person-Centred Approach, or Abraham Maslow's Psychology of Being are some important examples.

An extension of this movement appeared at the end of the 1960s with the **Transpersonal Psychology**. This "heights-psychology" began to explore the upper layers of the unconscious. The Spiritual Self, already exposed by Carl Jung in his scheme of the psyche, thus took an essential place in the conception of the human psyche. The 4<sup>th</sup> current, **Psychosynthesis** founded by Dr. Roberto Assagioli appeared to be the most complete one. It includes two major phases: personal synthesis (integration of the personality) and transpersonal synthesis (contact and fusion with the spiritual Self).

In the 1980s, the philosopher Ken Wilber widely theorized transpersonal psychology by explaining the multiple successive expansions of consciousness. He made it possible to make the link between the wisdom of oriental spiritualities and the personal and spiritual development of the human being. It was then that a 5<sup>th</sup> current was born, **Psycho-energetics**, which could be defined as the science that studies the interactions and transformations between all kinds of energies, both microcosmic and macrocosmic. This trend is still far from being accepted, perhaps because it goes far beyond the concepts of traditional psychology. It has, however, the merit of making psychology more integrative, even creating bridges with discoveries in quantum physics<sup>8</sup>.

Despite the appearances, these 5 currents that mark the history of psychology are not mutually opposing each other. In reality, they complement each other and their distinction comes mainly from the fact that they focus on one or the other dimension of the human psyche.

Today, the field of psychology must deepen and extend its understanding of the spiritual dimension of the human being by developing a true *psychology of the soul*. This new psychology emerging from the transpersonal current would initiate a revolution in the point of view of the psychologist. While humanistic psychology is based on a person-centred approach, here we have a *soul-centred psychology*. Therefore, two assumptions are necessary:

- The existence of the spiritual soul within each human being.
- The law of Reincarnation, conditioned by the Law of Cause and Effect.

This implies the understanding, like Teilhard de Chardin, that "we are not human beings occasionally living a spiritual experience, but we are essentially spiritual beings living a human experience". It is therefore a radical change in the way we conceive human beings, their crises, their psychological disorders and the treatments to remedy them. From this angle of research, the book *Esoteric Psychology*<sup>9</sup> remains a source of inspiration that needs to be studied in depth, but also developed and

applied in the academic world. Unfortunately, universities are not the forerunners in this area. And yet the tools developed today in neuroscience allow for innovative research.

The new psychology will require taking into account the rays of energies that qualify and condition the individual: the rays of the soul and personality, as well as the rays of the three lower bodies. In addition, the psychologist will have to consider the point of evolution reached by the individual. There will be recognition of the cleavages between the different bodies and an understanding of how to overcome them. On this subject, some meditation techniques may be suggested. The individual will therefore be asked to activate the will, a psychic function that is undervalued and not used enough in psychotherapy. Roberto Assagioli has remedied this breach somewhat with his book "The Act of Will".

Finally, an understanding of the life journey of the individual from an astrological perspective could give a lot of meaning to personal experience and above all a direction to follow in order to respond to the awakening spiritual aspiration; the aim being to draw a line of contact between personality and soul in order to allow their fusion. The relationship between the sun sign and the rising sign (ascendant) will give valuable insights into how this path takes shape in life and the possibilities for achievement. The mission of psychology is to reveal the spiritual potential of the human being in order to help him or her to realise oneself and to flourish. Today there is a lot of talk about happiness and the importance of being happy through positive psychology, but the "recipes" proposed are still often based on material processes to achieve it. For example, we are being sold an application to practice meditation training that highlights the effectiveness of the software, rather than really helping the individual to become aware of his or her own inner resources. Obviously this takes time, and time "seems" to be so lacking to our contemporaries.

All of the above represents a lot of work for the 8<sup>th</sup> seed group, but if we take into account the indications of the Tibetan, the psychological service will go far beyond the human kingdom. In fact, it implies the link between the higher and lower kingdoms through the human kingdom, the group An-tahkarana that will allow humanity to fully play its role as a planetary redeeming agent.

The Tibetan divides the work of psychologists into three parts<sup>10</sup>:

1. The relation of the human soul to the subhuman kingdoms in nature and the place of the human kingdom as an intermediary between the three higher kingdoms and the three lower.
2. The quality of the soul in the three subhuman kingdoms, with particular emphasis upon the animal and the vegetable kingdoms. The consciousness of the mineral kingdom is so far removed from the human that it is not possible for us to formulate anything about it in words, or to identify ourselves with it until after the expansion of consciousness which takes place after the third initiation—that of the Transfiguration.
3. A study of the Plan, as it appears at this time to be working out in the five kingdoms in nature.

And He adds that<sup>11</sup>: "The service humanity is to render is that of producing unity, harmony, and beauty in nature, through blending into one functioning, related unity the soul in all forms"

Humanity is able to achieve this planetary goal because it is conditioned by the ray of harmony. The challenges of our time require humanity to act as a unified whole to establish balance and right relations between the different kingdoms. There is an increase in knowledge about the behaviours within the various species; this makes it possible to develop an "animal psychology". We are also beginning to understand that there is subtle communication between trees. In short, a vast field of discoveries opens up before us.

It is to be hoped that the collective awakening to ecological urgency will influence current research. Moreover, Psycho-energetics integrates ecology into its foundations and opens new horizons for the psychologists of our time.

Let us go back to the human for a moment. What is psychology but the true understanding of the essential nature of the human being?

The profound nature of consciousness is still a matter of debate. The scientific consensus still has a materialistic point of view on the question. For the most part, consciousness emerges from neural interconnections within the brain. While from an occult point of view, consciousness exists before the formation of the brain.

That said, research is progressing, among other things, in various experiments carried out by neuroscientists. And the debate continues. For more than 25 years, *Mind & Life Institute*<sup>12</sup> has organised meetings between the Dalai Lama and researchers from various disciplines (psychology, neuroscience...) to discuss consciousness. These dialogues are not limited to the latest theories or philosophical considerations on the subject. The meetings are designed to answer questions such as: "What is a good life? What is suffering? What are its causes and how can we know them? What are the deep qualities of consciousness and how can they be brought out?"

The goal of the *Mind & Life Institute* is to create a new knowledge paradigm. The study topics incorporate qualities such as compassion, tenderness, respect, kindness, sharing and many themes that are not usually found in scientific research. This goes beyond interdisciplinary dialogue because since 2000, there has also been an experimental research program to measure the effects of meditation on the brain and emotions. In short, the synthesis between science and spirituality is underway.

It is also encouraging to see that meditation is beginning to take root in schools, and even in some prisons, in order to learn how to manage stress. In addition, millions of people in the West engage in meditative practices such as *Mindfulness*. More and more people are doing mental work to break out of the circle of selfish desire that causes emotional and physical suffering. We are moving beyond the previous situation where the patient passively relied on the skills of a psychologist or psychiatrist while waiting for treatment.

In short, it can be noted that the synthesis of meditative practice and transpersonal psychology prepares the ground for a large-scale awareness of the spiritual soul and its exploration in academic circles.
